AUDITOR'S STATEMENT

I hereby certify that I have examined the accounts of the Treasurer and find them correct and the balance in his hands to agree with the report submitted. I have approved vouchers for all bills paid and find them to agree with the Treasurer's warrants.

FREDERICK S. WITHAM,

Auditor.

Ipswich, Mass., Janaury 13, 1933.

Essex, ss.

Then personally appeared Frederick S. Witham, Auditor of the Town of Ipswich, and made oath that the above statement by him is true.

EDWARD S. COGSWELL,

Justice of the Peace.

Clubs	8
Flashlight	7
Touring car	1
Handcuffs	6
Lungmotor	1
Pistols	4
Twisters	6
Whistles	12
Gas club	1
Gas gun	1

Respectfully submitted,

EDWARD BLAUVELT,

Chief of Police.

REPORT OF FIRE ENGINEERS

To the Board of Selectmen,
Ipswich, Massachusetts.

Gentlemen :

The following is the report of the Engineers of the Fire Department for the year ending December 31, 1932.

Bell alarms	33
Still alarms	80
Total alarms	113
Number of feet 2½-in. hose used	13,350
Foamite used (gallons)	100
Water used from booster tank (gallons)	1,710
Chemical used (gallons)	220
Hours engine worked	10
Number of inspections made	110
Assessed value of property damaged by fire	\$25,550.00
Estimated value of contents	\$22,000.00
Loss to property including contents by fire	\$19,259.00
Insurance on property including contents	\$44,840.00
Total insurance paid	\$12,230.00

DEPARTMENT EQUIPMENT

Sanford Hook and Ladder	1
White Triple Combination Pump	1
White Combination Hose and Chemical	1
G. M. C. Combination	1
40-gal. Chemical Tank at Little Neck	1
Fire Alarm Boxes	23
Number feet chemical hose	600
Number feet 2½-in. hose	3,600
Value of Fire Department equipment owned by Town	\$45,000.00

We recommend an appropriation this year for the purchase of new hose, and service hats for the firemen. At present our hose supply is very low, and the firemen should have these hats as a means of protection from head injuries.

During the past year the supports of the apparatus floor have been strengthened, and new toilet arrangements have been made on that floor, as recommended in our last year's report.

We have also purchased additional signal wheels for our fire alarm transmitter (imaginary boxes) as they are marked on the fire alarm cards.

Inspection of the business buildings in the center of the town for possible fire hazards was started during the Fire Prevention Week in October, and will continue through the year. The co-operation of the owners and proprietors of the various buildings was very gratifying, their willingness to adopt suggestions offered by the men inspecting for bettering conditions, will surely mean lessened fire hazards.

We have recently secured the services of Mr. John M. Murney of the New England Telephone & Telegraph Company, an expert on first aid, to give weekly instructions during the winter, to the firemen and others that are interested, at the Fire Station on that subject. The men are very much interested in this, and we feel sure that some of them will take the full course and make themselves proficient in this art. There is an oxygen inhalator kept here at the Fire Station, with men trained to handle it, subject to call in case of any emergency arising requiring the use of any such instrument.

The permanent men experienced another gratifying success in their efforts to supply children with toys at Christmas time, and desire through this report to thank all those who helped make this success possible.

Respectfully submitted,

EDWARD H. SMITH,
GEORGE W. BROWN,
SAMUEL W. ATHERLEY,

Board of Engineers.

FOREST WARDEN'S REPORT

To the Board of Selectmen:

Gentlemen:

The following is the report of the Forest Warden for the year ending December 31, 1932.

Number of grass and brush fires 49

EXPENDITURES

Fighting fires	\$178.00	
Equipment and supplies	58.96	
Total expenditures	<hr/>	\$236.96
Unexpended balance		13.04
		<hr/>
Appropriation		\$200.00
Transfer from Reserve Fund		50.00
		<hr/>
		\$250.00

I recommend an appropriation of \$300.00 for a portable fire pump that we can carry in the woods and pump from brooks or ponds. This pump will be kept on Combination No. 3 and be hooked up to a booster tank and can be used for small house fires.

GEORGE W. BROWN,

Forest Warden.

REPORT OF SUPERINTENDENT OF MOTH SUPPRESSION

To the Honorable Board of Selectmen:

I herewith submit my annual report as Superintendent of Moth Suppression.

The work in this department varies but little from year to year. The gypsy and browntail moths have now been established so long and thoroughly in the East that the work has become practically standardized. This consists of two main phases, the Fall, Winter and early Spring work or creasoting the egg clusters of the gypsy moth and cutting the webs of the browntail moth. The second phase is the annual summer spraying campaign. It might be interesting to note here some of the other insect pests which are also controlled by this spray and which would otherwise cause a large economic loss. Principally they are the elm-leaf beetle, tent caterpillar, summer cankerworm and satin moth.

The moth situation in Ipswich this season is what might be termed normal, which is practically the same as has prevailed for the past couple of years, i.e. no marked increase or decrease in both the gypsy and browntail moths. However, both are still with us in appreciable numbers and the infestation is general throughout the township.

The satin moth which feeds only on willows and poplars was the past season at a very low ebb. The elm-leaf beetle was again especially abundant, but was held in check by an extra heavy spraying program.

It might be well to call attention to other pests which are now quite abundant or perhaps due to become so. These are the Fall webworm, which we have had with us the past two summers in ever increasing numbers, the Japanese beetle which has been reported to have been found in Ipswich, the Oriental moth, which while not found locally as yet is rapidly spreading in this

direction, and the apple magot, which is causing real concern to fruit growers. All of the above while they do not come directly under the work of this department are nevertheless controlled to some extent by the other work of the department or more especially by the private spraying done for individuals.

Respectfully submitted,

FRANCIS C. WADE,

Supt. Moth Suppression.

REPORT OF TREE WARDEN

To the Citizens of Ipswich :

I herewith submit my annual report as Tree Warden.

The work of this department the past year has been along the customary lines. It consists mainly of removal of dead branches and such others as have become too low so as to interfere with overhead wires, dwellings and traffic. Also considerable work has been done in conjunction with the local Light department in trimming so that the electric wires may be as free as possible from unnecessary interference from the trees.

Two public hearings have been held upon petitions for removal of public shade trees. One of these petitions was disallowed and the other granted. In the second case the trees have been removed. In addition to the above removals two other trees which were dead or in a dangerous condition have been cut down. Last winter and again this season considerable work in the line of brush cutting is being done on the outskirt roads. The men who are doing this work are sent to the department from the Board of Public Welfare in co-operation with the Unemployment Committee.

There is much work that should be done on the public shade trees in our town, but can not be accomplished without the funds necessary. As I have mentioned before the future of the shade trees in Ipswich is a matter of interest to all public spirited citizens and should bring forth a renewed interest in one of our greatest civic assets.

I desire to express my appreciation to all those who have assisted or shown an interest in the work of the department and I hope that this interest may grow threefold.

Respectfully submitted,

FRANCIS C. WADE,

Tree Warden.

REPORT OF BOARD OF PARK COMMISSIONERS

To the Citizens of Ipswich :

The Board of Park Commissioners herewith submit their annual report.

In general the work of this department the past season has been along the same general lines as in other years. Maintaining as far as possible neat and attractive lawns on both the North and South Greens, at the Giles Firmin Garden and Elm Street landing. Tulips have again been planted in the beds on both Greens and we hope for the usual Spring display of bloom.

Through the co-operation of the Board of Public Welfare and the Unemployment Committee special work has been done at the Giles Firmin Garden, Turkey Shore Pasture and Arthur Wesley Dow Park. At the first mentioned place the pond which had been previously started in a small way was considerably enlarged and is now two-thirds completed. This undertaking has already proved its worth in furnishing a safe place for the younger children to skate. There have been as high as fifty of the younger children enjoying themselves there of a night after school. On Turkey Shore the river bank on both sides of the Green Street Bridge has been given a thorough cleaning. Further improvement might be made here by leveling the areas adjacent to the sidewalks and erecting new guard rails of a more permanent character. At the Arthur W. Dow Park work is still in process, which we hope will make this wonderful location more accessible to the public. Dead and otherwise useless trees are being cut, paths and roads cut out, and a general cleanup given a long neglected area.

We would again call attention to the ever increasing tendency of the younger children to use the Memorial Plot on the North Green as a playground, especially at night. This is proving very detrimental to the grass and also

does not seem in keeping with the dignity of this plot. With an increased co-operation from the neighbors and parents we believe that this practice could be considerably lessened.

Respectfully submitted,

FRANCIS C. WADE,

S. C. GORDON,

E. H. PICKARD,

Park Commissioners.

REPORT OF SEALER OF WEIGHTS AND MEASURES

To the Honorable Board of Selectmen,

Gentlemen :

I have the honor to submit to you the annual report of the Department of Weights and Measures for the year 1932 :

	Sealed	Non-Sealed	Condem'd
Platform scales over 5,000 lbs.	3
Platform scales under 5,000 lbs.	22	1
Counter scales over 100 lbs.	1
Counter scales under 100 lbs.	23
Spring scales over 100 lbs.	6
Spring scales under 100 lbs.	33	5
Computing scales	41
Personal weighing scales	13	2
Prescription scales	3
Avoirdupois weights	168
Apothecary weights	36
Metric weights	9
Liquid measures	80
Dry measures	4
Gasoline pumps	72	21	2
Kerosene pumps	13	1
Quantity measures on pumps	389	1
Yard measures	11

Amount of sealing fees and adjusting charges collected and paid to Town Treasurer, \$99.69.

Respectfully submitted,

WILLIAM A. STONE,

Sealer of Weights and Measures.

REPORT OF THE BOARD OF HEALTH

The Public Statutes require that all diseases dangerous to the public health shall be reported to the Local Board of Health. Below is given a list of such diseases reported to this Board in 1932.

Lobar pneumonia	5
Measles	2
Mumps	5
Pulmonary tuberculosis	2
Tetanus	2
Whooping cough	8
Dog bite	1
Chicken pox	1
Scarlet fever	1
	<hr/>
Total	27

There were no deaths from any of these diseases which from one point of view is an excellent showing, but there is another side to the story. The expense for the care of these diseases, particularly tuberculosis, was larger than in any previous year. For tuberculosis it amounted to \$2,490.70. For care of the other diseases to \$537.47, a total of \$3,028.17.

A number of these cases were in other cities and towns where they were cared for, but their settlements being in Ipswich bills were sent to this department, which was obliged to reimburse the places where the aid was given. Ipswich will receive this year a subsidy of \$386.99 from the State, which goes to the Treasury, but not to the credit of the Health Department, from which it was paid.

The Department of Child Hygiene and Tuberculosis has been handicapped because the appropriation for 1932 was \$450.00 less than the sum requested. Because of this fact the Board was unable to appoint a nurse but the work was carried on by the Director. This Division had previously maintained a daily clinic in connection

with the schools, but this year, having no official connection with the schools, no information has been forthcoming from the School Department, so if an epidemic should occur among the school children delay in prompt action would be likely to result. In any case, the Division will do its best to obtain results, should an epidemic occur.

It is impossible to predict what the expenses will be in 1933. Already notices have been received from other places that they are furnishing aid to patients having an Ipswich settlement. We shall be obliged to meet conditions as they arise, as has been done heretofore.

The Board realizes that in these times of stress it is not wise to ask for large appropriations. We therefore request that the Finance Committee recommend that the appropriation be the same as last year, \$4,550.00.

Respectfully submitted,

GEO. E. MacARTHUR, M.D.,
CHARLES T. AMES, M.D.,
JOSEPH SALTZBERG,

Board of Health.

Ipswich, February 1st, 1933.

REPORT OF SANITARY INSPECTOR

To the Board of Health,

Gentlemen :

I submit herewith my report for the year ending December 31, 1932.

During the past year I have devoted a large portion of each day in following up complaints of unsanitary conditions existing in the Town of Ipswich. I have also inspected places reported to me as being injurious to public health, and in many instances have found it necessary to warn property owners to eliminate nuisances existing on their property. In most instances the warning has been sufficient. At times it has been necessary to use more drastic measures, although by the use of tact and diplomacy, I have not found it necessary to resort to court action. I feel that the position of Sanitary Inspector is one which should be considered of vital importance, in so far as the prevention of contagious diseases and the elimination of obnoxious conditions are concerned. During the past year contagious diseases have been reduced to a minimum, and I consider it proper at this time to report to your Board, that the general conditions as far as sanitation is concerned, are greatly improved over those existing a year ago when I assumed office and I attribute this improvement to an unceasing and unfailing following up of complaints from whoever they may emanate. I do suggest, that in the future, whoever is appointed Sanitary Inspector should be one who has the mental and physical makeup to appreciate the importance of the position, and temperamentally fitted to use tact and diplomacy in dealing with cases where firmness and fairness will accomplish the desired result.

When I assumed office I found that serums which at times are absolutely necessary and should be so situated as to be quickly and easily accessible, were not being properly attended to. I have made it a point to see that

there is a fresh supply of these serums kept at the local drug stores at all times. These serums are kept in a refrigerator at a temperature which makes them proper for use at a moment's notice.

During the past year I have devoted considerable time in company with the Superintendent of the Schools in making a thorough inspection of all school buildings. I have followed these up by making periodic inspections from time to time. Experience has taught me that inspections of restaurants are very necessary, and I have therefore during the past year, made every effort to see that restaurants and other establishments handling cooked foods have been thoroughly inspected, and the procedure followed in their kitchens and dining rooms have been kept up to a high standard of sanitation.

I attach hereto a list showing the number of permits and licenses issued by me during the past year.

Complaints received and investigated	60
Milk producers permits issued	38
Number of bakeries registered	8
Pasteurizing licenses issued	4
Cesspool and vault licenses issued	2
Tallow and soapgrease licenses issued	3
Contagious cards posted	5

Respectfully submitted,

BRAINARD C. WALLACE,

Sanitary Inspector, Board of Health.

MILK INSPECTOR'S REPORT

Number of milk dealers' licenses issued	48
Number of ice cream licenses issued	44
Number of oleomargerine licenses issued	5
Number of samples tested for butter fats	126
Number of timers at pasteurizing plants inspected	62
Number of sediment tests	80
Number of bacteria tests	59

Respectfully submitted,

EBEN B. MOULTON,

Milk Inspector.

REPORT OF INSPECTOR OF SLAUGHTERING

Number of hogs slaughtered and inspected	102
Number of calves slaughtered and inspected	37
Beef slaughtered and inspected	2
Sheep slaughtered and inspected	1

Respectfully submitted,

EBEN B. MOULTON,

Inspector of Slaughtering.

REPORT OF THE INSPECTOR OF ANIMALS

To the Board of Health,

Gentlemen:

I beg to submit my report as Inspector of Animals for the year ending December 31, 1932. I have inspected all cattle and the premises in which they are kept and find all in first-class condition.

Number of barns inspected	81
---------------------------	----

Number of cattle inspected	678
----------------------------	-----

After the State Tuberculin Test:

Number of cattle that reacted	200
-------------------------------	-----

Number of swine	81
-----------------	----

Number of sheep	2
-----------------	---

Respectfully submitted,

G. LORING WOODBURY,

Inspector of Animals.

REPORT OF UNEMPLOYMENT COMMITTEE

At a Special Town Meeting held on July 5, 1932, the following motion was adopted: That the sum of \$8.000 be raised and appropriated for the unemployment situation; that a Committee of three be appointed by the Moderator; that no member of the Committee shall be a Town office holder, and that the work be given to the most needy.

The Moderator, Mr. Charles E. Goodhue, appointed Thomas H. Reedy, George E. Hodgkins and Harcourt Amory to serve.

The Committee was specifically directed that Dunham's Corner be straightened and widened to prevent the numerous automobile accidents which had occurred at that spot. The Committee proceeding under these instructions spent the following sums on the projects as listed:

Project	Labor	Supplies	Total
Dunham's Corner Widening	\$1,001.26	\$419.15	\$1,420.41
Town Farm Road	430.50	31.07	461.57
Topsfield Road Drainage	1,160.55	846.91	2,007.46
Liberty Street Drainage	748.32	395.71	1,144.03
Spring Street Drainage	120.00	26.40	146.40
Tree Warden's Department	237.00	237.00
School Department	51.00	51.00
Water and Light Department	49.50	49.50
Board of Health Department	20.00	20.00
Highway Department	32.00	32.00
Selectmen's Department	52.88	74.64	127.52
Cement Sidewalks	648.23	353.57	1,001.80
Highland Cemetery	2,986.34	228.03	3,214.37

Under ARTICLE 6 of the same Town Meeting, it was unanimously voted that the sum of \$1.394.00 be raised and appropriated for the purpose of maintaining during the ensuing year, the Mosquito Control work as estimated and certified by the State Reclamation Board, in accordance with the provision of Chapter 112, Acts of 1931.

As this work was carried on under the State Reclamation Board supervision, and the men paid by the same Board, we are appending to this report the names of the men employed, and the sums that they were paid.

List of Names of Mosquito Maintenance

		<hr/> \$1,177.22
Appropriation	\$1,394.00	
Amount expended	<u>1,177.22</u>	
Unexpended Balance		<u>\$216.78</u>

At a Special Meeting of the Town on September 19, it was voted to appropriate \$2,000 additional funds to continue the work of the Committee. This was almost entirely expended on the Highland Cemetery project.

During the life of the Committee, it met once or more times each week, and, in addition, weekly with the Department of Public Welfare. Helpful suggestions for the expenditure of the unrestricted funds were received from the Board of Selectmen and from various department heads. In considering the various projects which were placed before them, the Committee acted under two principles:

First: to undertake projects where the maximum amount of funds was expended directly on labor and the minimum on material and supplies, and

Second: to undertake projects which seemed most necessary for the improvement of the Town and in as many different sections of the Town as was possible, consistent with the importance of the work.

The Committee was enabled to procure work on the various projects listed above for 125 citizens of the Town, the basis of pay being \$3.00 a day, and the number of days a week for which each man was employed being largely dependent upon his individual circumstances as recommended by the Department of Public Welfare and the Board of Selectmen.

In addition, your Committee has been able to furnish men for several Federal and State projects, being successful in supplying and keeping about 95% local labor on the Federal Aid State Road project.

In closing, we wish to thank Michael Ryan, Fred Harris and Chester J. Patch, who, by their cheerful donation of trucks, for many weeks without any compensation, have enabled us to carry on working facilities for many men, and to make ready for the Town to sell many hundreds of lots in the new Highland Cemetery.

(Signed) THOMAS H. REEDY,
GEORGE E. HODGKINS,
HARCOURT AMORY.

REPORT OF SUPERINTENDENT OF STREETS

To the Honorable Board of Selectmen,

Gentlemen :

I herewith submit the annual report and inventory of the Highway Department for the year 1932.

Along with the general maintenance work of the department 33,554 gallons of tar and oil were applied to the streets, covering approximately 134,216 square yards, and 24,000 lbs. of calcium chloride was applied covering 18,000 square yards.

The following table gives the mileage and amount of hours the trucks have worked on the department, also the amount of gasoline and oil used.

	Miles	Hours	Gasoline Gallons	Oil Quarts
Autocar	3,032	105	861	75
Ford Truck	6,313	2,273	970	61
Chevrolet Truck	4,508	1,573	682	41

INVENTORY

1 pair blankets, street	\$ 10.00
1 cart, two horse	50.00
1 cart, watering	50.00
1 crawler, tread and Sargent plow	1,000.00
3 drags, road	50.00
1 drag, stone	5.00
1 forge and anvil	35.00
Fences, snow	600.00
1 grader, Wheir	400.00

1 shovel, scoop tractor	45.00	
3 trucks, dump	1,700.00	
1 truck, pickup Ford	200.00	
2 tractors, Fordson	700.00	
1 wagon, oil	150.00	
All other tools and supplies	2,000.00	
Total		\$14,935.00

Respectfully submitted,

FRANCIS E. WOOD,

Supt. of Streets.

REPORT OF TOWN CLERK

Town Clerk's Office, February 1, 1933.

To the Honorable Board of Selectmen:

I herewith present to your Honorable Board the report of the Town Clerk for the year 1932.

VITAL STATISTICS

During the year 1932 the births numbered 128, a decrease of seven from the previous year.

Males 67

Females 61

Parents residing in:

Ipswich	93	Topsfield	2
Hamilton	5	Wenham	2
Rowley	13	Essex	6
Danvers	1	Gloucester	1
Waltham	1	Beverly	4

Fathers born in:

Mothers born in:

Ipswich	27	Ipswich	25
Massachusetts	48	Massachusetts	48
U. S. A.	9	U. S. A.	11
British Prov.	19	British Prov.	19
Poland	8	Poland	8
Greece	7	Greece	7
Italy	4	Italy	3
England	2	England	2
Sweden	1	Ireland	2
Turkey	1	France	1
Unknown	2	Sweden	1
		Turkey	1

IPSWICH TOWN REPORT

MARRIAGES

Total number			52
Grooms born in:		Brides born in:	
Ipswich	14	Ipswich	17
Massachusetts	23	Massachusetts	22
U. S. A.	7	U. S. A.	4
British Prov.	5	British Prov.	6
Greece	1	Ireland	2
Scotland	1	Scotland	1
Germany	1		

DEATHS

During the year 1932 the deaths numbered 76, a decrease of six from the previous year.

Males 41

Females 35

The following persons were, at the time of death, over eighty years of age:

	yrs.	mos.	dys.
Jan. 22—Caroline B. Kinsman	85	7	3
Jan. 28—John H. Nicholson	90	8	8
Feb. 16—Henry S. Willcomb	87	10
Feb. 17—Rose D. Thuot	83
Mar. 1—Emma J. Safford	85	7	29
Mar. 2—Maria A. Preston	82	1
Apr. 9—Maria L. Russell	88	3
May 14—Anna E. Thurston	81	4	23
June 10—Almeria B. Brown	85	23
June 21—William H. Andrews (of Rowley)	81	11	9
June 30—Cyprien Doiron	86	1	10
Aug. 31—Mary L. Hull (of Essex)	90	4	8
Oct. 8—Sylvester W. Wentworth	80
Oct. 16—Christopher F. Chisholm	82
Nov. 5—Philip Kimball	93	14
Nov. 12—Stephen R. Harris	84	2	7
Nov. 18—Martha A. Fenno	86
Dec. 24—Celina Berthianna Lemieux	87

I wish to call attention to the following in regard to vital statistics:

It is important that these records shall be correct. If any errors are discovered, the Clerk will deem it a favor to have them reported at once, so that correction may be made:

Some of the many reasons why births should be recorded:

To prove legitimacy.

To establish identity.

To prove nationality.

To show when a child has the right to enter school.

To show when a child has the right to seek employment under the Child Labor Law.

To show when a child has the right to apply for a license to operate a motor vehicle.

To establish the right to inheritance to property.

To establish liability to military duty as well as exemption therefrom.

To establish the right to vote.

To establish the right to hold public office.

To qualify to hold title to, and to buy and sell real estate.

To prove the age at which the marriage contract may be entered into.

To make possible statistical studies of health conditions.

As required by Chapter 46, Section 15, General Laws of Massachusetts notice is hereby given that the Town Clerk will furnish blanks for returns of births to parents, householders, physicians and registered hospitals' officers applying therefor.

The following licenses were granted through this office :

Billiard and Pool	1
Common Victuallers	22
Druggist Third Class	2
Junk Shop	1
Slaughtering	1
Innholder	7
Hawkers and Pedlers	2
Bottling	1
Bowling Alley	1
Auctioneers	2
Motor Vehicle Agent—Class 1	4
Motor Vehicle Junk—Class 3	1
Amusement	1

Dogs 314 ; Sporting 209 ; Trapping 9 ; Lobster 6 ; Crab 4 ;
 Duplicates 2.

For the benefit of the owners and keepers of dogs the following extract of the General Laws is hereby submitted :

General Laws, Chapter 140

SECTION 137. The owner or keeper of a dog which is three months old or over shall annually, on or before March thirty-first, cause it to be registered, numbered, described and licensed for one year from the first day of April following.

The owner or keeper of a licensed dog shall cause it to wear around its neck a collar distinctly marked with its OWNER'S NAME and its REGISTERED NUMBER.

SECTION 138 The owner or keeper of a dog may at any time have it licensed until the first day of April following, and a person who becomes the owner or keeper of a dog after April first, which is not duly licensed and the owner or keeper of a dog which becomes three months old after March thirty-first in any year, shall, when it is three months old, cause it to be registered, numbered, described, licensed and collared as required by the preceding section.

(Example under Section 138 above.) If a dog is born on June 1, 1932, he becomes three months old on September 1, 1932 and should be licensed on that date for the period September 1, 1932 to April 1, 1933 (when it becomes necessary to relicense him for the year April 1, 1933 to April 1, 1934.)

Respectfully submitted,

EDWARD S. COGSWELL,

Town Clerk.

ASSESSORS' REPORT

In making this, the annual report of the Board of Assessors, there has been included the work sheet that is used in computing the tax rate, and tables of aggregates covering the work of this Department.

In placing the value on real estate this year, fully realizing the condition of the real estate market, we used the same values where there were no changes as in 1931, by so doing we felt it better than a general reduction as the result obtained was the same the only difference being in the tax rate.

We increased our overlay somewhat over previous years feeling that owing to conditions there would be more deserving cases needing relief.

We are this year faced with our first case before the Board of Tax Appeals, namely the Crane assessment, feeling it better to have this case settled by said Board denied their application in full, if they are successful in their plea we will be faced with a deficit in our overlay account which will have to be raised in next levy after case is decided, which in all probability will not be before our 1933 rate is made, therefore we will have to increase our 1933 overlay to meet this condition if it arises so not to have it all come in one year as it might make a large increase in rate for that year.

Owing to a large reduction in revenue and increased appropriations we got an increase of \$2.20 in our rate, and from all we can gather at this time there will be another reduction this year in about the same ratio. Our estimated receipts this year were about \$3,000.00 in excess of estimate, which amount has been applied to excess and deficiency account, which now amounts to about

\$13,000.00, if some of this could be used in 1933 it will aid materially in keeping our rate down.

Respectfully submitted,

C. CHESTER CALDWELL,

GEORGE FALL,

JOHN E. NORMAN,

Assessors of Ipswich.

We desire to record here our regret that George Fall, who has been an efficient member of the Board of Assessors since 1918, has decided to retire this year, and to express our appreciation of his loyal and intelligent service to the town as one of the Assessors.

C. CHESTER CALDWELL,

JOHN E. NORMAN

REPORT OF THE CLAM COMMISSION

To the Board of Selectmen,

Gentlemen :

The Clam Commission wish to make the following report. The clam industry in Ipswich is in a very serious condition. Various reasons may be advanced for this. The disappearance of the eel grass may have something to do with it as something of this nature is necessary to hold the spawn of the clam before it is developed enough to enter the flats. The great number of green crabs probably are another of the causes because undoubtedly they destroy a great many small clams, and lastly and perhaps most of all, the demand of the market for small clams and the short sightedness of the clambers in digging up the very small clams and the utterly stripping of the flats by indiscriminate digging.

Conforming to a vote of the town there has been no seeding of flats this year. No large area of flats were closed this year as had been previously done.

The Commission want to call the attention of the citizens to the fact that if something drastic is not done the clamming industry will soon be a thing of the past. A great many people do not realize that the clam industry is the real major industry in Ipswich today and every citizen is interested in its revival.

The Commission recommend a program of seeding the depleted flats and the closing of a large area for future clamming. It is up to the citizens as to whether this great industry will be saved to the town of Ipswich or be taken over by the State and finally leased out to private control.

HENRY S. BOWEN,

CHARLES E. POOR,

THOMAS R. ROBERTS,

Clam Commissioners.

PUBLIC WELFARE REPORT

To the Citizens of Ipswich:

The Board of Public Welfare respectfully submits the following report for the year 1932:

Expenditures

Out Poor	\$28,830.99	
Mothers' Aid	1,845.00	
Old Age Assistance	5,282.00	
Labor, paid by cash	\$7,291.89	
Labor, paid by orders	1,938.00	
	<hr/>	
	\$9,229.89	
Town Infirmary	6,000.00	
	<hr/>	
		\$51,187.88

Reimbursements Receivable

From State and Cities and Towns	\$4,000.00	
From State Mothers' Aid	612.00	
From State Old Age Assistance	3,000.00	
From Town Infirmary	896.90	
	<hr/>	
		\$ 8,508.90
		<hr/>
		\$42,678.88

The reimbursements are approximate, as the exact figures were not available when this report was sent to the printer. However, they are not overstated.

Desiring to know how our expense compared with that of other industrial towns, a score of questionnaires were sent out. Quotations from several of the replies will serve to show that the expense in Ipswich has been below that of the average town similarly situated.

	Population	Expense for each 1000 Inhabitants
Amesbury	10,000	\$ 7,900
Salem	43,353	10,000
Gloucester	25,000	10,500
Marblehead	8,202	12,400
Easthampton	11,000	14,500
Ipswich	6,000	7,500

In fairness to Ipswich, it may be said that some of the other towns had assistance in keeping their expense down which Ipswich did not have. It is maintained that any criticism of the local Board for extravagance would be unmerited. The Board has not spent too much, but too little. The fact is, that the poor have not been adequately aided, even though no case of actual suffering has been permitted to go unrelieved. The Board would welcome investigation by any unprejudiced expert in welfare work.

The poor have been given short allowance because it was realized that the town's finances should not be subjected to a too severe strain. In the effort to keep down the cost, the general policy has been to find out if the applicant had any resources upon which he could call before coming to the town—if he had any money on deposit or elsewhere, if he had any property upon which he could secure a loan, or if any members of his family, relatives or friends could assist him. And when it was found that he was helpless and in actual need, if he was a single man, he was offered a temporary home at the Town Infirmary; if a married man with a wife and no children, he was given a weekly allowance of \$3.00, or \$4.50 if circumstances warranted, and was requested to reimburse the town by work furnished by the Unemployment Committee at \$3.00 per day; if he had two to four dependent children, he was given \$6.00 weekly and allotted two days' work to reimburse the town; if there were six or more children, he was given \$9.00 weekly and three days' work for reimbursement. Beside these amounts, he was allowed wood and medical attendance. Of course, those who were unable to work were not expected to do so. These allowances were indeed small,

being barely sufficient to keep soul and body together. But the Board had no money to use except that which came from the taxpayer—the large taxpayer whose income had arrived at the vanishing point, and the small taxpayer working part time or at reduced wages many of the latter having defaulted and many others standing in line for abatement of the tax on their little homes. The dependent poor could not starve, nor could the poor taxpayer be utterly broken down. This was the problem which the Board had to solve, and it is heartening to know that their efforts have been understood and appreciated by the great body of representative citizenship.

In the work of investigation, the banks have been consulted, the Assessors' and Town Clerk's Departments called upon for information, and every effort made to ascertain the financial condition of the applicant, the Agent of the Board meeting with unfailing courtesy and co-operation by all these officials. Cognizance, even, has been taken of the idle stories heard upon the street and of the unreliable information whispered secretly in the ear—all have been looked up, with the result that only an occasional one has had any foundation in fact. To keep in close touch with all those receiving aid, the Board every Friday evening has reviewed each case, making readjustments whenever necessary, also reassignments of work, Mr. Reedy and Mr. Hodgkins of the Unemployment Committee being generally present, and their secretary, Miss Shulayko, acting as interpreter and all-around assistant, Mr. Amory being present at the meetings of the Committee on Wednesday evenings. These meetings have continued until after midnight, many of them not concluding until 1.30 on Saturday mornings. To properly manage the increasing volume of work, regular meetings are now held on Tuesday as well as Friday evenings. It is not too much to say that, notwithstanding the close supervision maintained by the Board, fraud or imposition has occasionally crept in, but it is certain that the amount has been negligible. Such things are incident to Welfare operations in all other communities.

It is our pleasure to state that the Unemployment Committee, working without funds for more than three

months, has rendered a service to the Board and to the Town that has been of much value. To find work each week in the various departments for over one hundred men has been a task of no small proportions, yet the Committee has accomplished it, working with no little degree of patience and persistence, without reward and at a sacrifice to their own personal affairs. Many worthwhile projects have been attempted and brought to completion, and thus the town has had considerable in return for unemployment outlay. We refrain from mentioning what these projects are because it is understood that they will be specified in the report of the Unemployment Committee. The arrangement whereby the Board and Committee have been working together is about the best that can be devised and we recommend that it be continued. It seems too much, however, to ask the Committee to do this without something approaching adequate compensation. This is said without the consent of the members of the Committee.

In the combined Out Poor and Infirmary Divisions the Board has handled \$51,000 at a cost of \$1,050 for salaries of Board and Agent, or approximately 2%. There is surely no cause for complaint on the grounds of administrative charges. The Agent is practically a full-time man at part-time pay. His automobile is constantly at the service of the Board free of charge. In some communities the work of the Old Age Assistance Division is conducted by a separate Bureau at an additional administrative cost, but here the work is done by the Board of Public Welfare at no extra charge.

Prospects in the Out Poor Division for 1933 are not reassuring. Immediate improvement in the labor situation is a forlorn hope. Finding jobs is out of the question. They cannot even be bought. Our clamming areas, from time immemorial the resort of those temporarily out of employment, always prolific hitherto, are now nearly depleted. When every other help fails men must turn to the town, and the town must aid, if ever so little. New applications are being received practically every day. For a time at least the expense must grow heavier instead of lighter, because of the increase in the number of dependents and the fact that the small allowances that have been made must necessarily be increased.

MOTHERS' AID

There has been no change in the number of Mothers' Aid cases during the past year, but the amounts allowed have been somewhat reduced because of the lower cost of commodities. The total amount now being given is \$31.00 a week, plus medical attention, medicine, and an occasional order for fuel. The state reimburses the town $33\frac{1}{3}\%$ on expenditures in this Division.

OLD AGE ASSISTANCE

Thirty-five persons above the age of seventy years are receiving this form of public assistance, at a total cost of \$150.00 a week. The smallest allowance is \$3.00, the largest \$8.00, the latter being given to a man who has lost both legs. The average is \$4.29 per individual. The number of this class of dependents has been reduced this year by three, who have passed beyond the need of aid or sympathy. The reimbursement by the state is one-third the total expense.

CABLE MEMORIAL HOSPITAL

The number of persons treated at the hospital during 1932 who were unable to pay for the same was 91, the total charge being \$2,496.15. This accounted for all but \$3.85 of the town's appropriation of \$2,500.00. Emphasis should be laid upon the fact that the town makes this appropriation not for those who are unwilling to pay for their care, but for those who are actually unable. The members of the Board of Public Welfare are the ones who are to pass upon question of the patient's ability to pay. Unless in case of emergency, none should go to the hospital of their own accord, or be sent there by others, with the expectation that the town will pay the bill, until the Public Welfare has been consulted and has determined that the patient is entitled to free treatment. There are families in town with as many as five children, all of whom have been born in the hospital, the town paying the institution and the doctor in each case. The Scriptures say, "be fruitful and multiply," but they do not add, "at the expense of the public." It is a rather ungracious thing for a man or woman to go to the hos-

pital and, after receiving treatment, to walk out saying, "I cannot pay." They should say this before they go in, when, if they prove their case, they will be cheerfully admitted and afforded best of care and treatment.

THE COURT

There have been seven cases brought before the Court, the charges being mostly non-support and desertion, judgment being rendered against the defendants in every instance. The Town Counsel and Police Department has co-operated with the Public Welfare, the police in one case locating the offender in a distant city and returning him here for judgment.

TOWN PHYSICIAN

Owing to the large increase in number of those who have applied to the Board for medical attention, imposing a much larger amount of work upon the doctor than heretofore, his compensation was increased this year. His salary covers medical attendance only, surgical work being an additional charge. He has treated 1,497 town cases and 208 state cases. The increase in number of patients cared for by the Town Physician will explain the larger drug and medicine bill.

THE TOWN INFIRMARY

The number of inmates has been the largest in many years, 17 being the maximum, 13 the minimum, and 15 the average. The weekly cost per inmate has been dropped to \$6.55, which is somewhat below what it would have been at Tewksbury. No additional appropriation has been made for the Infirmary, the amount voted by the Annual Meeting being found sufficient. Under the supervision of Mr. and Mrs. Dorr, the Infirmary, both inside and out, has experienced a wonderful transformation. The place is as clean and tidy as hands can make it, the inmates are supplied with an abundance of wholesome, home-cooked food, are happy and contented as may be, and a cheerful, home-like atmosphere pervades the place at all times. Through the good offices of the Light Commissioners under the immediate direction of

Manager Mallard, electric lights have been installed, at a practical cost of \$150.00 for material. The opportunity to dispel the gloom and dispense with the danger of loss of life to the aged inmates through the use of oil lamps, could not be passed by, especially when the expense was so small. The cost of electric lights will not be much more than that of lamps and lanterns, and this will soon be reduced by the saving of expense for work that has hitherto been done at other places.

Outside the House, the grounds are well kept and the appearance is inviting. The sheds and barn are models of neatness. There is a fine herd of accredited stock, which the Superintendent is proud to exhibit. Although the past year was a poor season for farming operations, crops being none too good and the selling price of products at a ruinous level, the inventory shows an increase of \$239. In addition to the regular farm work, the farm team has moved two families, has hauled 1,000 yards of gravel from the pit to Farm Road, and is credited with 18 days' work in hauling wood from the lot to the woodyard.

ACKNOWLEDGMENTS

We are indebted to Miss Gladys F. Hall of Salem, Field Secretary of the Essex County Red Cross, and to Miss Alice M. Smith of Ipswich, local representative of the same organization, for a considerable quantity of cloth which has been distributed to the needy. Also for 960 bags of Red Cross flour of excellent quality, Mr. James Wile trucking the same from Gloucester to Ipswich at no cost to the town. Acknowledgment of other trucks loaned by various persons will be made in the report of the Unemployment Committee. Dr. Charles W. Townsend's contribution of \$25 for relief work and 20% of the Salvation Army special appeal fund for 1932 amounting to \$47 for relief work, also \$50 in order blanks from the First National Stores were gratefully accepted. The work of the Society for the Prevention of Cruelty to Children merits appreciation. Miss Pamela Dulaney of Beverly and Mrs. Vera R. Ross of Ipswich have been untiring not only in behalf of the little people but of all persons who were in need. The expenditure of their

liberal fund derived from private contributions has saved the town hundreds of dollars. There has been closest co-operation between the S. P. C. C. and the Welfare Department, the duplication of assistance being avoided and the work of investigation made more thorough. The \$1,400 given by the school teachers from their salaries, all of which was expended for labor at the Green Street Stadium, was a distinct help in relieving the unemployment situation.

HOLIDAY BENEFACTIONS

The churches, patriotic orders, benevolent fraternities, and many individuals including Mrs. Amy L. Goodhue, Miss Margaret Chisholm, and others, were especially active during the holiday season, and the viands from the many baskets which they distributed graced what might otherwise have been barren tables on Thanksgiving and Christmas Days. From the receipts of the Policemen's ball, 40 baskets were filled with good things to eat and placed in needy homes, the contents of each basket being valued at not less than \$3.25. The regular drivers of local fire apparatus give Mrs. Ross 5% of their wages with which to buy clothing and shoes for the children. The proceeds from the Firemen's ball, \$99.00, were given for the same purpose and entrusted to the same careful hands. Ten baskets, each containing food values of \$3.50, were sent to as many homes, and toys were given to 600 children by this generous organization. The Rotary Club played host to 800 school children at the Town Hall, candy, toys, etc., being given to every one. In many schools the teachers, from their own incomes, spent liberal sums for Christmas gifts to their pupils. At the Shatswell School shoes were bought for a number of pupils by the teachers, baskets laden with food sent to several families, and 60 pecks of apples were distributed. These benefactions could not have been otherwise than helpful to the Public Welfare. The choir of Ascension Memorial Church, accompanied by Mr. Perry, the rector, visited the Infirmary on Wednesday evening of Christmas week, carrying with them for distribution among the inmates good things in variety and in quantity sufficient to stock a store. Many a heart was warmed by this mani-

festation of the Christian spirit and many an eye moistened with gratitude. These things taken together served to recreate the old-time holiday atmosphere, and their memory has doubtless helped many of our people to be patient in their distress, knowing that someone cares.

WALTER F. POOLE,
CHARLES V. HILLS,
JOHN R. MORRIS,

Board of Public Welfare.

The declination of Mr. Morris to be a candidate for re-election to the Board is received with profound regret by his colleagues. Perhaps no official ever rendered more faithful and conscientious service to the town than he. His knowledge of the routine work of the Board, gained through years of experience in distressing times, specially fitted him to further serve the town in the present crisis. His place will be difficult to fill.

WALTER F. POOLE,
CHARLES V. HILLS.

SELECTMEN'S REPORT

To the Citizens of Ipswich :

The maintenance of our public highways is a very important duty connected with the Selectmen's department with an annual appropriation of \$25,000 or more to take care of over 100 miles of roads. We firmly believe that for the amount expended over this territory our roads are in a very good condition. Additional work in the way of drainage has been done this year on Farley Avenue, Topsfield Road and Broadway and drainage has been completed from Washington Street under the Canney estate to Farley Brook. Those who were selected for work by the Unemployment Committee were given work under their direction.

The Department of Soldiers' Relief this year has been a problem for the Selectmen, never in the history of the town has this department been given any more attention. The veterans were given small allowances the Selectmen having in mind the taxpayers who have to pay the bills. While we believe that we may make some reductions in expenditures in some departments the coming year the expenses of the Soldiers' Relief department will show an increase. We wish at this time to acknowledge with thanks the receipt of \$100 of free orders for this department from the First National Stores.

During the past year certain areas of clam flats were closed on recommendation of the Clam Commissioners which, however, did not meet with much success as there were not any seed clams to grow. Unless some action is taken regarding the propagation of clams the shell fish industry of Ipswich will be a thing of the past.

The Police and Fire Departments are making their own reports which will be found on other pages of the Town Report.

The Selectmen feel at this time that every department of the town should use strict economy in order that we may be able to keep our tax rate at the present level.

Respectfully submitted,

JOSEPH F. CLAXTON, JR.,

EDWIN H. DAMON,

J. VINCENT HUBBARD,

Selectmen of Ipswich.

REPORT OF TRUSTEES OF MEMORIAL HALL

On Page 89 of this report a detailed statement of the receipts and expenditures made for the year 1932 in connection with Memorial Hall, will be found.

Receipts

Appropriation for 1932 bills	\$2,000.00
Appropriation unpaid bills of 1931	160.00
	<hr/>
	\$2,160.00

Expended

For 1931 bills	\$ 160.00
For 1932 bills	1,996.35
Unexpended balance	3.65
	<hr/>
	\$2,160.00

Net Expense

Less received for rents	\$360.00	
Unexpended balance	3.65	
	<hr/>	363.65
Net expense for the year 1932		<hr/> \$1,796.35

During the year 1932 a number of needed repairs have been made inside the building with very little expense as we have been fortunate in having as janitor of the building George E. Matheson, who, with the assistance of some of the Legion men, has put through the work at the cost of material only.

During the coming spring we feel it is necessary to paint the woodwork trimmings of the building outside. It will not be a very expensive job and we hope to be able

to do it without asking for any increase in our regular appropriation.

It may be a matter of interest to the citizens to know that during the ten years the patriotic orders, who use the building, have voluntarily paid to the Town towards the cost of maintenance of the building the very generous sum of \$9,156.

Respectfully submitted,

JOSEPH F. CLAXTON, JR.,
RALPH C. WHIPPLE,
JAMES M. MCGINNIS,

AUDITOR'S REPORT

To the Citizens of Ipswich :

I submit herewith the annual reports of the various trust funds of the Town of Ipswich as compiled by their respective treasurers. I have found receipts for all bills paid, have examined the securities comprising these funds and find them to agree with the reports submitted.

FREDERICK S. WITHAM,

Auditor.

Ipswich, Mass., February 6, 1933.

Essex, ss.

Then personally appeared Frederick S. Witham, Auditor of the Town of Ipswich, and made oath that the above statement by him signed is true.

Before me,

EDWARD S. COGSWELL,

Justice of the Peace.

PART II

Water and Light Report

TOWN OF IPSWICH

THIRTY-NINTH

ANNUAL REPORT

OF THE

WATER AND MUNICIPAL LIGHTING

COMMISSIONERS

FOR THE YEAR 1932

OFFICERS OF WATER AND LIGHT DEPARTMENT

COMMISSIONERS

ARTHUR H. WALTON, Chairman	Term Expires 1933
J. E. COLE, JR.	Term Expires 1934
CHARLES A. MALLARD	Term Expires 1935

TREASURER AND COLLECTOR

JOSEPH T. MORTON	No. 2 Office, Town Hall
------------------	-------------------------

DEPARTMENT OFFICERS

Manager of Light & Water Dept.	Charles A. Mallard
Chief Operator Power Plant	Earl D. Hardy
Line Supt. Light Dept.	John H. Harris
Construction Supt. Water Dept.	Stephen Woodman

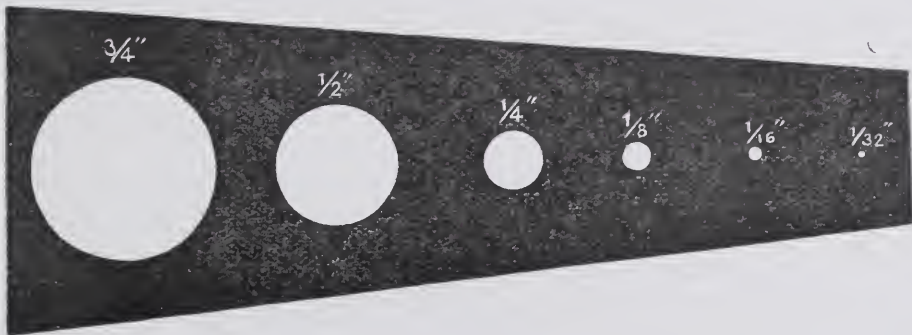

Office Hours of Light and Water Dept. 9 A. M. to
5 P. M. except Saturdays, Saturday 9 A. M. to 12.00.

A meeting of the Commission is held each Friday
night at 8 P. M. at the Office Room No. 5.

CAUTION TO WATER TAKERS

Do not blame your meter

If you have a leaky fixture; have it repaired.		If not	
		gal. per day	per day
1-2	in stream consumes	10,800	\$3.40
1-4	in. stream consumes	8,640	2.60
1-8	in. stream consumes	3,240	1.10
1-16	in. stream consumes	1,080	.30
1-32	in stream consumes	360	.11

The above will show you what a small leak will amount to if allowed to remain unchecked, under our pressure of 70 pounds at Ipswich, Mass.

MANAGER'S REPORT

Statistics

Number of new meters installed in Town proper for year	68
Number of new meters installed on Great Neck and Little Neck	160
Total number of meters at end of year 1932	2,094
Output of current and distribution of same:	
Total K. W. generated	1,703,102
Total K. W. bought	115,800
<hr/>	
Total K. W. generated and bought	1,818,902
Total K. W. accounted for commercial light	614,555
Total K. W. accounted for commercial power	319,536
Total K. W. accounted for domestic power	154,193
Total K. W. accounted for street lighting	222,650
Total K. W. accounted for Town buildings	25,729
Total K. W. accounted for station light and power	160,662
Total K. W. accounted for water pumps	95,940
<hr/>	
Total accounted for	1,563,265
Total unaccounted for	255,637
<hr/>	
	1,818,902
<hr/>	
Total number of 60 candlepower street lamps in use	890
Total number of 400 and 600 candlepower street lamps in use	84

There is approximately 45 miles of electric lines on highways in Ipswich and on these lines there is a total of 1,087,168 feet of wire varying in size from number 6 to number 00.

Great Neck and Little Neck Extension

There was 22,170 feet of underground cable installed on Little Neck with 7 underground transformer vaults and 27 distribution boxes. A total of 147 cottages were connected and 128 of these were in use during the season of 1932. The total cost of the Little Neck job was \$14,066.89 which received \$1,947.34 from Little Neck or a return of 14% on the money invested.

The construction work on both jobs outside of the labor of digging trenches on Little Neck was done by the regular force of the Electric Department.

Unemployment

In order to help relieve the unemployed all of the digging on Little Neck in connection with the underground cables was done by hand labor thus giving some work to 40 different men furnished by the unemployment committee for a total amount of \$1,221.50.

From some time in December 1932 up to the time of this report and as long as we can continue to do so, the Water Department has employed from five to ten men, furnished by the unemployment committee, in connection with the digging up of the main water pipe on the new road being built on the upper end of High Street and for improving conditions around the water storage basins on Dows Brook and Bull Brook. This work consists of cutting of brush around these basins and rebuilding fences.

Recommendations

I would recommend that the Town appropriate the sum of \$10,000.00 for street lighting in compliance with Chapter 269 of the Acts of 1927 which fixes the price at which electricity shall be sold for this purpose.

That the present methods used for metering electricity for domestic purposes be changed from a two meter system, one for power and one for light, to a one meter system for both purposes with the rate to be fixed on a sliding scale. This would eliminate the present need of two meters in the same house would save the customer from having two sets of wiring in the house and I believe it would mean a larger consumption of electricity.

C. A. MALLARD,

Manager.

COMMISSIONERS' REPORT

To the Citizens of Ipswich:

The Municipal Water and Light Commissioners submit their annual report for the year ending December 31, 1932.

Water Department

The expenditures for the year 1933 estimated as follows:

For Interest	\$ 1,596.25
For General Expenses	13,000.00
For Note Payment	4,500.00
Total	<hr/> \$19,096.25

We recommend that this amount be appropriated from the earnings of the Department.

We would recommend that the sum of \$3,000.00 be transferred from the balance in the Water Department to the Town Treasurer to be used to reduce the Tax Levy.

We would also recommend that the unexpended balance in the Department be appropriated for the use of the Department.

Electric Light Department

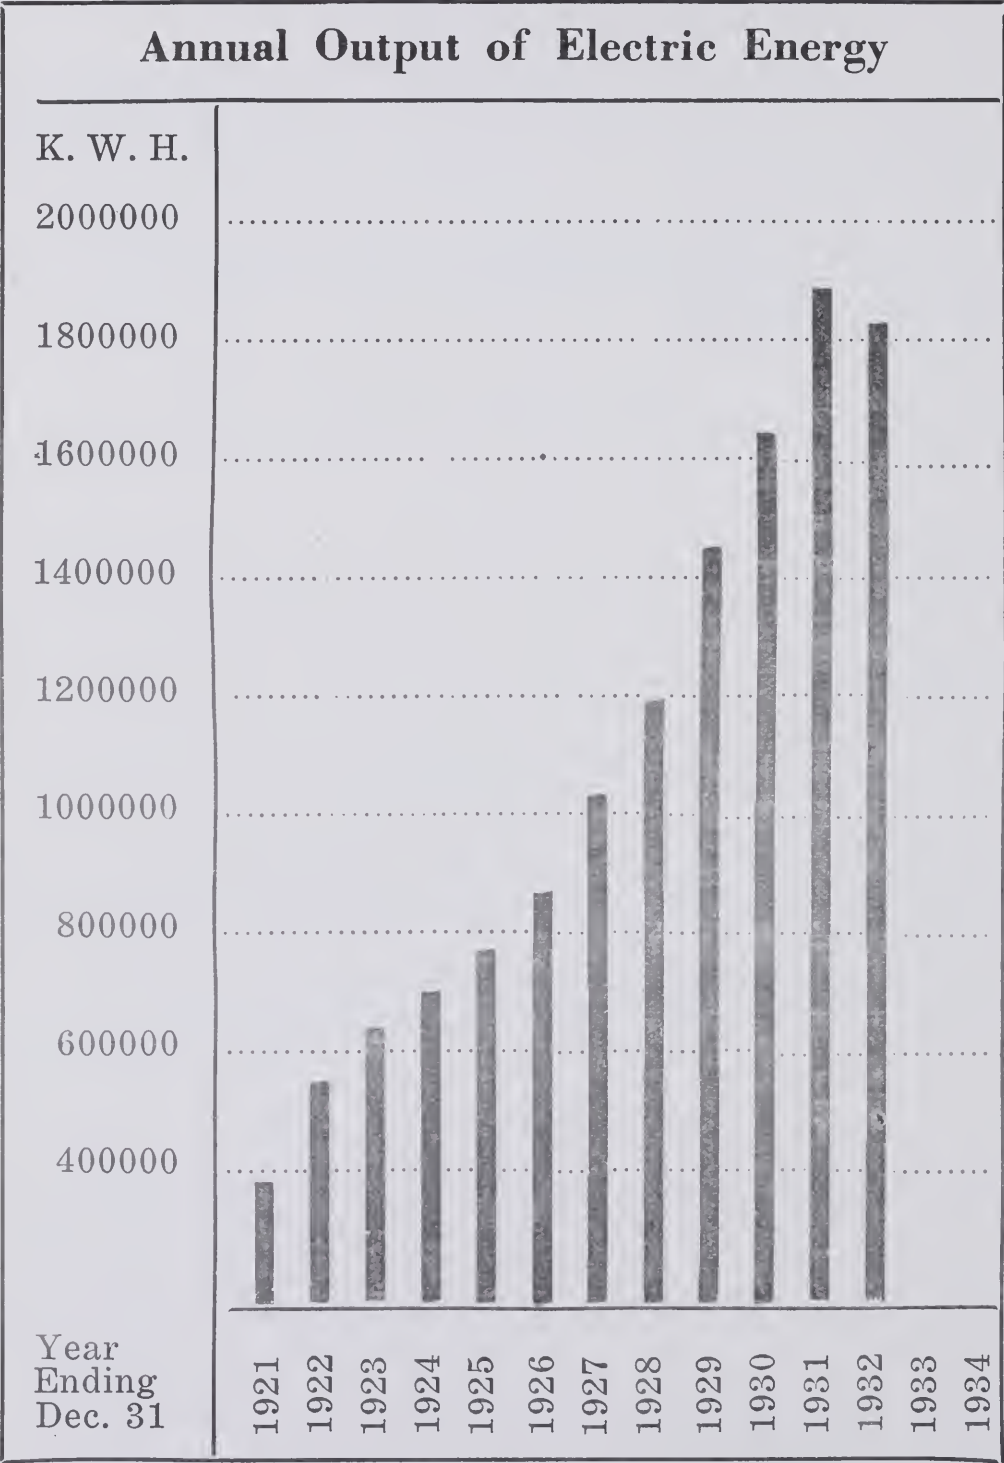

The Commission unanimously agree that the system used for metering the domestic consumer should be changed to a one meter system with the rates on a sliding scale. Plans will be made to make this effective with the idea of lowering the rate on the new schedule to domestic consumers.

We recommend that the sum of \$3,000.00 be transferred from the balance in the Electric Light Department to the Town Treasurer to be used to reduce the Tax Levy.

We recommend the unexpended balance be appropriated for departmental purposes.

On account of the general condition of business and the lack of employment the Electric Light Department has failed to increase the output of current for the first time in many years.

As shown by the Manager's report the electric lines and services were extended to Great Neck and Little Neck the past year.

ELECTRIC RATES

House and Commercial Lighting

Eight cents per K. W. hour with a reduction of 10 percent if the bill is paid on or before the 20th of the month. Minimum charge of 50 cents per month, adjustable once each year.

Household Power Rates

To include heating, cooking, battery charging, etc. No motor above 1 H. P., or any motor used commercially at 4 cents per K. W. hour and no discount. Minimum charge of \$2.00 per month.

Commercial Power

6 cents per K. W. hour for first 50 K. W.

5 cents per K. W. hour for next 100 K. W.

4½ cents per K. W. hour for next 300 K. W.

4 cents per K. W. hour for next 500 K. W.

3½ cents per K. W. hour for all over 950 K. W.

Minimum charge of \$2.00 per month for 2 H. P. or less and \$1.00 for each additional H. P. per month, no discount.

Summer or Part Time Rate for Great Neck and Little Neck Extensions

12 cents per K. W. for current consumed. A minimum charge of 10% of the cost of construction, payable annually in advance, until the cost of construction is retired. The minimum charge to be determined by the number of consumers or applicants. The minimum charge to include current consumed, at the rate per K. W. specified, the balance consumed, if any, to be adjusted at the end of each season. No discount.

ARTHUR H. WALTON,

JAMES E. COLE, JR.,

CHARLES A. MALLARD,

Water and Light Commissioners.

AUDITOR'S STATEMENT

This is to certify that I have examined the books of the Water and Electric Light Department and find them correct.

FREDERICK S. WITHAM,

Auditor.

Ipswich, February 6, 1933.

COMMITTEES' REPORT

To the Citizens of Ipswich :

Once more it is my privilege to bring to you a report of your Committee.

During the past year we have endeavored to purchase only supplies which were absolutely necessary. Repairs have been made only in cases where neglect would have caused a hardship or a menace. The largest single item of expense was teacher's salaries. The Committee realizes that the salary question has been and still continues to be the target for criticism but they are unanimous in the opinion that there should be no reduction at this time.

The teachers and all other school employees have agreed to contribute five per cent of their wages to aid in the unemployment situation. This contribution is forthcoming until the end of the school year. This is the course taken in a great many cities and towns because of the fact that it does not affect a teacher's retirement fund, while a reduction in salary would lower the annuity to which a teacher is entitled at the age of retirement.

This contribution was wholly voluntary and shows a good spirit of co-operation.

This year the town received from the state the sum of \$9,570, a reimbursement for salaries paid to teachers. This amount goes into the Excess and Deficiency Fund as do the following items: Rowley tuition \$3,755, tuition from Beverly, Lynn and Worcester \$629.57, and Evening School refund \$134, making a total of \$14,088.57 which we are obliged to ask for in our budget but which is returned to the town treasury.

Although many complaints are made with regard to the expense of running the Ipswich schools, the following summary indicates the numerical rank and standing which Ipswich holds among the 355 cities and towns of the Commonwealth in reference to educational outlay, etc.

In population, U. S. census of 1930, her rank is 117. Boston with a population of 781,188 stands first, while Prescott with a population of but 48, holds the 355th or last place.

The valuation of 1931 per pupil in net average membership for the year ending June 30, 1932, gives Ipswich a rank of 247. Expenditure for school support from local taxation for the fiscal year 1931, per \$1,000 valuation entitles her to a rank of 103. In the per capita cost for the support of public schools for the fiscal year of 1931 from local taxation, she ranks 242, and from all sources, her mark is 317.

These last items are State ranks and are arranged in the **descending** order of their valuation per pupil in the net average membership. For example the town of Gosnold with extreme valuation per pupil in net average membership of \$128,200 has a State rank of 1, but her rank under the expenditure for school support from local taxation for the fiscal year 1931 per \$1,000 valuation is 355 the highest in the State.

These are State averages and are derived from the combination of the classification of the towns and cities of the State into four distinct groups: Viz.: Group I, the thirty-nine cities; Group II, Towns having a population of 5000 or over and maintaining a high school; Group III, Towns of **fewer** than 5000 and maintaining a high school and, lastly, Group IV, Towns of fewer than 5000 population and **not** maintaining a high school.

It must be evident that any comparison drawn from such wide extremes and variations as indicated above, though valuable and important in general considerations, would fail to interest any considerable number in any single locality. Moreover, the same may be said of any comparison drawn from the towns of our own group. The extremes even here present too wide a divergence. With the town of Brookline with an index of 40 at the top and the town of Easton with an index of 122 at the bottom of the group, it may be seen that a comparison with towns more nearly of our own size and wealth would hold not only a deeper local interest, but express more nearly our actual status and relationship. Again there are 34 towns in this group of a total of 123, that choose to remain here simply because they prefer a town form of government. They are cities in everything but political classification, and any numerical comparison with these would be unfair to us, and it certainly would be unfair to those smaller towns whose overhead is altogether out of proportion to their enrollment.

So selecting eleven towns from this group whose size and wealth varies but slightly from those of our own, we hope to secure a clearer notion of our own status in relation to these towns and also to glimpse some indication of the manner in which we are meeting our responsibilities to our State, our Town, and our children.

Of the eleven towns selected, Amherst stands as the upper extreme, and Easton as the lower. The following data has been culled from the Annual Report of the Department of Education and is submitted for your consideration.

	Amherst	Ipswich	Easton
Population rank	112	117	122
Valuation	9,425,903	7,591,545	5,243,835
Enrollment	1,449	1,492	1,155
Teachers	57	50	43
General Control	6,452.17	4,187.72	5,394.28
Salaries Prin. and Teachers	83,845.67	67,590.53	69,497.90
Other Exp. for Instruction	3,917.88	3,266.32	3,255.35
Promotion of Health	2,123.43	1,675.53	2,431.82
Transportation	7,081.53	9,201.76	9,507.30
Total for Support	124,475.60	100,314.44	107,580.75
Buildings and Grounds	1,467.11	504.60	302.26
Valuation per Pupil	7,688	5,533	5,004
Expenditure from Local Tax	99,017.68	92,012.14	78,463.80
Per Pupil in Ave. Mem.	80.76	67.06	74.87
Reimbursement Genl. Sch. Fd.	9,828	9,410	11,137.50
Per Pupil in Ave. Mem.	8.02	6.86	10.33
Received from Other Sources	17,042.81	4,767.27	16,709.84
Total from All Sources	127,706.03	106,189.41	109,665.38
Per Capita cost			
pupil enrolled	88.13 +	71.17 +	94.95—

Our per capita cost has been reduced \$5.23 this year.

Our average is \$57.27 against the State's \$112.44.

From the foregoing one can plainly see that Ipswich is securing education for her children at a minimum cost and although comparatively the cost is low the quality is high.

In closing we wish to state as in past years, the Committee will be very glad to receive any helpful suggestions or constructive criticism, and again wish to impress on the parents that it is their duty to visit the schools and observe first-hand the teaching methods of today.

ERNEST J. SMITH, Chairman.

SUPERINTENDENT'S REPORT

To the School Committee of Ipswich,
Gentlemen:

The thirty-first annual report of the Superintendent of Schools is herewith submitted for your consideration

The general plan or outline will deviate but little from that of former years. We are pleased to add, however, that the Chief of the Fire Department and the Agent on Sanitation for the Board of Health have both joined our educational fellowship and their contributions may be found in this report. This is a distinct acquisition to our educational forces, for it tends to integrate all the civic agencies of the town in a common purpose, a combined effort to promote the interest and welfare of our schools. From such solidarity the schools have nothing to fear and may hope for much.

Enrollment

A glance at the enrollment sheet reveals a marked change in the distribution of pupils in the different

grades. Formerly the accommodation for pupils in the first grades was our chief concern. But at present there is a complete reversal of the situation. Today it is the upper grades—from the seventh to the twelfth inclusive—that are overcrowded. As a result we have the largest junior and senior high schools in the history of the town. Our senior high school houses more pupils than the entire enrollment of some of our surrounding towns. The same is also true of the junior high school.

Such crowding has made necessary certain changes to furnish increased seating capacity. **But it has been done.** One boy in the high school vibrates between Mr. Whipples' office and my own as conditions in either are the more conducive to quiet study and reflection. He is a good boy, however, and is welcomed in both places. If others were like him, we might accommodate one or two more.

In the junior high school no such opportunities offered. Our only resort was to remove the two remaining wardrobe standards, transfer the hooks to the corridor walls, and set up the steam pipes against the wall at the rear of the extemporized class room. A few old desks found in the attics of the school buildings completed the furnishing and each pupil was given a seat.

Extra Curricula Activities

This caption has no reference nor relation to baseball, football, basketball, or hockey. All these have their place and value in any scheme of recreation and they may serve also as genuine character-builders under right supervision and leadership. But they have been so commercialized that, except in too few instances, they have become completely divorced from the original in-

tent and purpose of these useful and time-honored sports.

Our schools, without exception, I think, have been engaged in an activity during the entire year that is so useful, so helpful, and so important in our present situation, that the taint of commercialism can never rest upon it. It occupies a unique position in educational programs, and by its **works** furnishes an indisputable evidence of its real worth as an agency in building into the character of our youth those moral and spiritual values which are the foundation of society.

Our teachers have caught the vision, and by their breadth of soul have thrown down a friendly challenge to both home and church. No other agency in this town, except the S.P.C.C. with which our schools are in fullest sympathy and accord, has done more to supply the material and physical needs of our school children. No school child needs suffer from lack of food or clothing. Nor do our teachers stop here. Every person in the Coburn Home was remembered at Christmas time. The local Hospital came in for its share of attention; and in **one** school every child made something to take home and present to his mother. Has it become unnecessary in this day and generation to teach children to respect their parents?

But I must cease harping on this string, I am stealing someone's else thunder. The president of the S.P.C.C., the school nurse, and the principals of the various schools will each make her contribution to this report. I have asked them to lay especial emphasis on this phase of their splendid work. Their co-operation with the Red Cross, the Babies' Hospital, and other humane and humanizing institutions and association, will be told in their several reports. Read them for they will furnish delightful reading.

This is not the customary or the traditional place to record what I am about to write. But this is not an acknowledgment; it's a confession. Here it is: In all my long experience with teachers and children nothing has given me a deeper love for my work nor so filled me with the sense of an enduring satisfaction than to know that our teachers, one and all, are **"going about doing good."** They are giving of themselves, voluntarily and cheerfully, and the noble example they present to our children will remain as an abiding influence for right living.

School Grounds

The work at the Shatswell School grounds is very nearly completed. No extensive work need be undertaken for some time to come. When new arears are built about the basement windows on the eastern side of the building, the present flower bed can be extended and this will complete that project.

It must be gratifying to those living in this neighborhood to note the improvement that has taken place in these school grounds. Of course, much of what has been done is foundation work and, at present, is still in the raw; but we have every reason to believe that in time this preparation will give a good account of itself and will grow in beauty with each returning year.

A word of commendation must be given to Mr. Grant for his continued interest in everything pertaining to the welfare of this school. He is a model janitor and the school department and the town are fortunate in securing such whole-souled and loyal service. The principal and her corps of teachers are to be congratulated for the orderly and considerate treatment of the school

grounds as shown by their pupils at all times. It's a valuable training for later life.

The grounds of the Burley School, though late, have come in for their share of attention. After many suggestions and conferences as to the one best plan, it was finally agreed that a hedge of shrubbery separating the sidewalks from the grass plots immediately in front of the building would be the most appropriate treatment of the scheme. A two-foot trench was dug the full length of the building and then refilled with good loam. Into this has been set a hedge of Japanese barberry which is to be kept low in order that the narrow grass-plots may not be hidden from view. The old unsightly shrubbery that was massed about the doors has been taken up and removed to the extreme and opposite corners of the enclosure. A blue spruce has been set out on each side of the driveway leading to the coal bin, and a row of daffodil and tulip bulbs has been planted along the front walls of the building. Two flowering dogwoods in the Manning School plot have been root-pruned and will be transferred to the Burley School grounds in the early spring. The grass-plots have been resurfaced and re-seeded and had made a promising start when winter set in.

It may not be out of place to remind you that not one cent of this outlay came from the school appropriation. Every expense of beautifying our school grounds has been met from contributions by individuals, the teachers of the schools indicated, and the net proceeds from our Field Day exercises. It represents a total well above \$1000.

In this connection let it be said that the thanks of the community are due to Mrs. Walter Hayward, Mr. Thomas Reedy of the Welfare Department, to Mr. Fred

Harris for the use of his truck, and to Mr. Burnham of the Chebacco Nurseries for a voluntary extension of credit.

These projects have something more than an esthetic value. They not only develop an appreciation and love for the beautiful but they have a property value just as real and certain as any quantity or quality you may select. It furnishes a desirable environment to live in and the value of a neighborhood is enhanced by its presence. It trains for good, orderly citizenship than which there is no more urgent need than at the present time.

Discipline

This word covers the whole range of corrective ways and means. Within its extremes lies every degree of authority and power. The gentle leadings of kindness and the legalized taking of human life are both within its borders. Each and all have their legitimate use as time and occasion may demand; each and all should have but one objective.

This is a matter of grave concern to parents and teachers especially in these days when distractions and temptations are so prevalent and alluring. Then, too, the general tendency of the times is to let things go. Such matters as health and education and character are supposedly inherent in the individual and receive their best development from natural forces.

No greater fallacy can be found anywhere. No other agency could be more destructive of human society. Men do not become angels by natural inclinations. The elder Pliny, I think it was, who said that a boy is the wildest of all wild animals. No, children are empty vessels, and need the guidance of mature minds. It's a matter of

training and environment. The process should begin with the child's earliest years, yes, months, and should be continued until a reasonable degree of self-control is assured. New-born babies get a training in the hospitals, that is soon lost after the child is returned to its home, simply because the mother fails to take a comprehensive view of the situation, and fondling and coddling take the place of intelligent training. She loses sight of the real objective.

It is my settled conviction that too many of our boys and girls are failing simply because parents are unwilling that their children should be held up to their best efforts. A little pressure from the home would be of lasting benefit to the child.

There is no rhyme nor reason in a pupil's getting B's and C's and D's when his I. Q. indicates an ability to do A work, and he should not be allowed to fall below. There is too much ability going to waste along this line. I have come to the point where I place as much confidence in a child's attitude towards work and his determination to win success, as I do in his I. Q. To be sure, an I. Q. registers mental ability, but it is no guaranty against mental laziness. And laziness is not incurable.

Neither should our efforts be confined to mental abilities alone. There is the whole range of ethical, moral, and spiritual values to be considered. None of these can be neglected if we hope to develop an approximation to the perfect man.

If we could impress upon our children the idea of a right relationship between his neighbor and himself—the real difference between right and wrong—this world would become a paradise. Thy neighbor and thyself cover the whole range of social achievement, and the

status of our civilization is measured by its results. Let all the standards of our schools be maintained.

Most unjustly and from unauthoritative sources the schools have been accused of recruiting the ranks of the racketeer and of furnishing the raw material for gangdom and organized crime. This statement is not borne out by facts. The great majority of our criminals never went beyond the sixth grade, many of these never having reached it. In view of the real facts, I wonder if these critics would be willing to raise the school age or make it compulsory for a child to complete the eighth grade.

There may be a modicum of truth in some of these assertions, but even so, do our critics wish to hold the schools responsible for all the wrong doing that occurs? Even now with all their limitations of authority to enforce discipline, our schools are measurably successful in dealing with these collections of creeds, colors, racial stocks, and social backgrounds. Let others do as well.

Curriculum Changes

In the committee's report of last year the chairman gave the opinion that the time was at hand for making a thorough revision of our courses of study. He further stated that those subjects which had a direct bearing on the vital problems of the day should supplant those traditional studies whose functioning with present day needs was of doubtful value. In this judgment he was certainly ahead of the times. For today, Educators, almost without exception, are setting a new appraisal on those subjects that do not measure up in functioning value. The ancient classics and the dead languages, so called, are faring badly at the hands of some of the out-

standing leaders in the educational field. In fact, there has been a complete return to their former place of those subjects, which a few years ago suffered an almost total eclipse. It is now acceded that even arithmetic is the science of numbers and has a place and value in the new curriculum.

Physiology and hygiene are recommended to take the place of French in high schools and to be given a full daily period for an entire year. We may dislike to see a modern language deposed by such common-place subjects as physiology and hygiene. But yet, to the great mass of our people, isn't a knowledge of the human body and the rules for keeping it in health of more importance than a smattering of French? The functioning value is certainly greater, and another objective is to discourage superficial study. For those who are capable, however, French will always have an open door and so will other languages.

Who are the men chosen by our late presidential candidates to accompany them through their campaigns? Professors of economics, commerce and industry, international relations, finance, law, and political and social science. These may not be representative of the highest cultural values, but they indicate the demand of modern times. These will receive the serious attention of leading educators and be presented in a form adapted to secondary schools.

The natural and social sciences also will have a larger place in the new curriculum. A slight or elementary knowledge of such subjects as astronomy, zoology, botany, geology, etc., would add much to the enjoyment of a worthy leisure and possibly open a door for an intensive study of one or more of these subjects that would result in lasting benefit to humanity. This will require

an extension of the high school term and open the way for the junior college. Under more favorable conditions, the new program may receive the serious attention it deserves.

Obituary

Martha J. Stewart, R. N.

IN GRATEFUL APPRECIATION OF
HER SERVICES AS A DEVOTED
NURSE AND A PIONEER IN THE
WELFARE WORK OF THIS COM-
MUNITY, THIS TABLET IS EREC-
TED BY THE SCHOOL CHILDREN
AND TEACHERS OF THE TOWN
OF IPSWICH IN TESTIMONY OF
THEIR AFFECTIONATE REGARD
1932

It is with feelings of genuine sorrow and with the sense of a great loss that we record the passing of Miss Martha J. Stewart from this community. No word of mine can adequately portray her noble Christian character nor tell of her complete devotion to the cause in which she labored.

The tablet in the Winthrop School was set up as a memorial to her work and worth. And though it may endure for years to come, it can never express the loving sympathy and appreciation in which she is held by those who benefited from her loving service.

Through good report and ill, she carried on long

after her failing strength gave warning which went all unheeded. To give relief from suffering and to comfort those in sorrow was her chosen life work, and she pursued it with a fidelity that never faltered even to the very end.

She loved children; and how the children loved her may be shown by an incident that actually occurred. While her body lay in the church just previous to the funeral service, two little boys appeared at the door and asked the attendant if they might not kiss Miss Stewart.

What finer tribute could anyone wish.

The Situation

A few industries show some improvement, but general conditions remain about the same as last year. Perhaps there is more hysteria and confusion of thought; but, with the elimination of one disturbing factor after another, confidence will return and we shall be on the upswing to prosperity again.

But many important changes must be made if we are to enjoy that freedom from anxiety which is a stumbling-block to all progress. Men's bodies must be clothed and fed and sheltered, and their minds must be at rest. They must be given an equal opportunity and a square deal. So in our efforts to restore those desirable conditions of peace and happiness, let us look the facts squarely in the face and carefully determine how the larger interests of society may best be served. Above all things let justice tempered with mercy be the foundation upon which a structure whose maker and builder is God shall be raised.

Right here and now I wish particularly to emphasize the fact that any society worthy of the name and that is to endure, must be built upon the bedrock of moral and spiritual foundations. Sand won't do. Nine-tenths of the "ills we have" are directly traceable to the ignorance and the violations of this fundamental truth. The sooner we return to its wise and beneficent teachings, the sooner our troubles will disappear.

Before the Pilgrims landed upon our shores they drew up a compact that they would enact just and equal laws which all should obey. That compact righteousness personified; and upon it they built a State that for more than a century remained the wonder and admiration of the whole civilized world, an asylum for the oppressed, a refuge for the afflicted of every race, color, and creed.

Today our legacy from Calvin Coolidge extends the rule and practice of the Forefathers and brings it up to date. Here is what he says: "We do not need more material development, we need more spiritual development. We do not need more intellectual power, we need more moral power. We do not need more knowledge, we need

more character. We do not need more government, we need more culture. We do not need more law, we need more religion. We do not need more of the things that are seen, we need more of the things that are unseen." "That truth appropriated," said the author, "will lift present day depression."

Now since our reconstruction program has been established and has been endorsed by thinking people everywhere, let us look over some of the material with which we are obliged to deal to the end that our work may be systematically and thoroughly done.—Done without fear or favor, and with that singleness of purpose that shall commend itself to all right-minded people.

First of all we are suffering from an obsession of bigness. To the ordinary mind this is synonymous with strength, security, and safety. Under certain conditions these words would convey the proper meaning, but not always. It all depends upon the use to which this big power is put. If it is used for the amelioration of human suffering, or to raise the general level of humanity, then it is great. But if it is used despotically and as the agent of grinding oppression, then it is not great, but dangerously big.

It will hardly be necessary to elaborate this point any farther. Those of us who may be painfully familiar with the Krueger and Toll, or the Insull corporations will get my meaning. They had the power to ruin thousands of innocent people, and intentionally or not, they exercised that power. "The big financial interests of the country," so testified the secretary-treasurer of one of our big labor organizations before a senate-judiciary committee recently, "have a strangle-hold on the business and labor conditions throughout the country. He made the statement that 855 interlocking directorates were cen-

tered in the directorate of a single bank." Here is a power that makes or breaks at will. Is it any wonder that socialism should gain strength under such conditions? A subsidised press and subsidised colleges, and pulpits even, do the bidding of this powerful octopus. The list could be extended almost indefinitely. But should such things be permitted in a democracy? If not, where lies the cure?

This is a machine age, and its efficiency has displaced millions of workers and reduced them to a condition of beggary. Crime is increasing at an unprecedented rate, and both life and property were never more open and exposed to its violence. Unemployment has added millions to the ranks of the unfortunates, and the rigors of the law have made thousands homeless. The moral fiber of the nation is being weakened among all classes and conditions. Agitators and propagandists are received by increasing audiences of our youth. What is the remedy?

That I have already pointed out. But what are the agencies by which this work is to be accomplished? It is no time for experimentation. We must rely upon those moral forces that have served us so well through a long, long past: the church, the home, and the school.

With the first I can do but little except to give it my moral and financial support, and to acknowledge my affiliation with it by my upright walk and conduct before men.

The home, the mightiest of the mighty, sits between the two as the mistress of the whole world. No other word, in any language, can awaken such a host of blessed memories nor bind together so securely the scattered families of the earth. From no place have come nobler influences for good, from no place have greater sacrific-

cies been offered upon the altars of the world. Unquestionably the home has fallen from its former high estate; but she must redeem herself, and take again her proud position among the beneficent agencies of the world. The world is looking to her for help in our time of need.

But what of the schools? Are they to take their place among the rational forces of reconstruction and progress, or are they to serve as lubricants to the over-reaching financial and industrial machinery of the world. Our schools are not responsible for this intolerable situation, neither should they be involved in the general calamity.

The schools have always given a good account of themselves, and have proven their reason for being. "The child with no schooling has one chance in 150,000 of performing distinguished service; with elementary education, his chances are increased four-fold; with a high school his chances are 87 times as great; with college education, 800 times larger." It costs \$384 a year to keep a man in prison; it costs \$100 to educate him.

MASSACHUSETTS TEACHERS' FEDERATION
15 Ashburton Place, Boston

PRESIDENT HOOVER ON SCHOOLS

On January 5, 1933, President Hoover, speaking at the opening session of the Citizens' Conference on the Crisis in Education, said as follows:

"Our nation faces the acute responsibility of provid-

ing a right-of-way for the American child. In spite of our economic, social and governmental difficulties, our future citizens must be built up now. We may delay other problems, but we cannot delay the day-to-day care and instruction of our children

“Our governmental forces have grown unevenly and along with our astounding national development. We are now forced to make decisions on the merits of the various expenditures. But in the rigid governmental economies that are requisite everywhere we must not encroach upon the schools or reduce the opportunity of the child through the school to develop adequate citizenship.

“There is no safety for our republic without the education of our youth. That is the first charge upon all citizens and local governments

“Above all, may I ask that throughout your deliberations you bear in mind that the proper care and training of our children is more important than any other process that is carried on by our government. If we are to continue to educate our children, we must keep and sustain our teachers and our schools.”

Now, who are to be our Mentors?

“God give us men! The time demands
Strong minds, great hearts, true faith, and willing hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who can stand before a demagogue
And damn his treacherous flatteries without winking;
Tall men, sun-crowned, who live above the fog
In public duty and in private thinking.”

The schools should provide equal opportunities to all, if possible. This will require some drastic changes if the adjustment is to succeed. Instead of laying all the stress upon classical and commercial subjects, etc., more emphasis must be given to the vocational, including the agricultural side of schooling. It is to these boys who have no taste for academic work that our attention should first be given. What is to be done with the 300,000 boys who have left home and school and are today leading a vagabond life, getting their living off the country, and engaging in all sorts of criminal practices.

A considerable movement of back to the land would help to relieve our cities of their quotas of the unemployed and make for better citizenry. But these must be taught the elementary principles of one or more branches of scientific farming, and this is today the work of the schools. Without this training, the last state would be worse than the first.

In confirmation of this theory, let me say that the waiting-lists of our vocational and agricultural schools far exceeds their enrollments. Italy and Germany are sending whole families back to the land by the hundreds of thousands, and those New England towns, and States too, that are numerically agricultural in their vocations, have no unemployment, no welfare department, and no deficits.

All these schools should become larger factors in our systems of common school education. The Essex County Training School at Lawrence, Mass. is one of our best representatives of this new type of school. The opportunities for adjustment to a half-dozen lines of self-supporting industry are here presented. We need more of these schools to assist not only boys, but adults as well. We need to teach avocations as well as vocations

if the fluctuations of industrial hazards are to be reduced. This is imperative if we are to avoid these major business disturbances in the future.

Not only does such training conduce to self-support and self-respect, but it breeds a love of home. Small home building is advocated by our best statesmen everywhere, and many of our states, especially New York State, are spending vast sums in furtherance of this plan.

Perhaps it has never occurred to us that life in the country is a great character builder. Here is what our ex-President has to say on this point. "Life in the open is a great character builder. From such life much of the American spirit of freedom springs."

The best men of all times have shown a deep and abiding love for the land.

Anything that promotes or develops a knowledge or a skill that will help to relieve the financial burdens of the home and the family and thereby multiply the opportunities for worthy leisure and the pursuit of happiness is a legitimate function of the school and it should be so recognized. Under this heading, simple home nursing should have a place. Ipswich is conveniently located for such a worth while undertaking and we hope under more favorable conditions this work may receive the consideration it deserves.

The manual training and domestic science departments are doing a necessary work along these most useful and practical lines. They should be expanded, not eliminated.

"It is cheaper to buy bread than it is to make it," so say those who are living in three-room apartments and so say those who cannot make it. But if we are to place any economic, social and ethical value on the home as a desirable and outstanding factor in our community life,

or in our civilization even, then let us, by all means, turn our attention and our every intelligent effort to the rebuilding of our broken homes. Show me a community of good homes and I will show you a desirable place in which to live.

Ipswich has received 950 bags of flour from the Red Cross Society, part of which, I am told, is still on hand. It also received 350 yards of cloth to be made into garments for the needy. If any part of this contribution is still unused, as I understand it is, it may be a competent question to ask why it is so?

But let us drop this question, and ask another. Who were and who are the individuals who took this raw material and transformed it into those usable and useful products that are filling present needs and still remain as the sure promise for time to come. Their is but one answer to this question: Those who know how and were willing to put that knowledge to immediate use. These you find in every church and social organization; they are the builders of human society; they are the few and the fit.

Our Home Making Department is doing its best to increase the number of these "fit."

I am writing too much, but I cannot resist the temptation to cite this single incident: A girl in high school asked permission to take an additional period in this course. When asked if she made the request for the sake of gaining an extra credit without much effort? she replied, "No, we have a large family at home and I can be of more help to my mother by taking the extra period."

Needless to say that the principal, who is humane on occasion, granted her request. The school is a **blessing** to that home.

The manual training department is giving a good account of itself in these times of stress. Many a home has been brightened and cheered by the advent of an old heirloom that has been renovated here at the school and then returned to its place of honor in the family home.

It would be impossible to enumerate all the practical things that are undertaken by this department. They all come within the scope of home economy, and will be more prized by these pupils later on when they realize what a power this course has given them in caring for their own homes.

The work in mechanical drawing is another important work of this department. It is well done and is commendable of teacher and pupil alike.

These two departments are the hardest worked in the whole system. Their hours are the longest—from eight in the morning until one-thirty in the afternoon and from two until four.

These are elective courses and so many of our high school pupils have chosen them that we were obliged to deny this privilege to the entire sixth grade. With more room and better facilities for handling more classes in these departments, the sixth grade might come into its own again.

I cannot emphasize too strongly the practical use of these courses to each and every one of our pupils; and had I the means and the power, I would require a full course in one or the other of these departments as a requisite for graduation and a diploma.

In view of the wide spread hysteria caused by the extended depression and it is not imaginary—it is very real and pushes itself into every condition and walk of life,—it behooves each of us who cares to assist in the work of redemption to do some individual thinking. Co-

operation and charity must be our attendants; but before we are capable of doing any effective work either singly or unitedly, we must decide on the way out. The seriousness of the situation is recognized by the brightest and best minds throughout the whole world. The consensus of opinion seems to be that our attention should be directed along the lines of our intellectual and moral and spiritual development, rather than to the material things of life. This, of course, should not be understood as ignoring the necessities upon which our lives depend, but to bring to the front once more those principles of righteous living and doing to the end that the coming generation may be able to meet the problems of a society that is becoming more and more complex and confused as time goes on. Their task will not be an easy one, and no more important nor solemn obligation rests upon the present generation than to give the best possible preparation to the next. They should not be asked to restore what they did not ruin. If our children are the seed corn of the nation, the character of the harvest is dependent upon what we do for them. H. G. Wells says, "It's a race between catastrophe and education." Many will agree with him; many will go farther and admit that Democracy itself is on trial with the chances overwhelmingly against her. This may or may not be true; but surely this is no time for optimistic drivel or drift. It means work.

Prosperity may be just around the corner, but the corner will not come to us. Mahommed found that the mountain would not come to him, neither will prosperity come to us. We must not wait for capitalism, nor industrialism nor legislation to work their imperfect work. Each and all of these have failed and betrayed us in

turn. Mass production is not the panacea we supposed it to be; so wherein lies our hope?

In the return from the captivity each man built the portion of wall directly in front of him and the whole wall was restored and renewed.

This report could have no more fitting close than these two quotations,—one from the French Director of Education made while the World War was in progress, the other from an American who visited that stricken country to observe how the schools of France would carry on in the midst of that terrible carnage.

First:

“We admire, not without reason, the serenity of the farmer who two steps from the battle line is sowing for the future his grain on the bloody furrows. *** Let us admire none the less these teachers who all along the line of fire hold their classes within the sound of cannon; they also are sowing for the future.”

Second:

“Do not let the needs of the hour however demanding, or its burdens however heavy, or its perils however threatening, or its sorrows however heartbreaking, make you unmindful of the defense of tomorrow, of those disciplines through which an efficient democracy is possible, through which the institutions of civilization can be perpetuated and strengthened. Conserve, endure taxation and privation, suffer and sacrifice, to assure to those whom you have brought into the world that it shall be not only a safe but also a happy place for them.”

The above is of general or universal application; but in addition to this Ipswich has a personal responsibility. By reason of our historic background and our

geographic position, this town holds exceptional possibilities of becoming a splendid educational center. She has been warned; her obligations are admitted; upon whom will the reproach and penalty of our neglect fall?

Acknowledgments

This is no perfunctory task. On the contrary, it is with feelings of sincere gratitude and thankfulness that I note the many evidences of a better understanding and a friendlier relationship between the community and our schools. The unity of purpose and the growing desire of integration by so many of our civic associations and departments are gratifying evidence of a growing community interest and spirit. These are the things that make for real progress, and we salute and welcome them. May their tribe increase.

And so without acknowledging individually and specifically all the many favors and kindnesses the schools have received from so many sources, but still mindful of my obligations to individuals and officials alike, may I conclude in the words of Tiny Tim, "God bless us every one."

Respectfully submitted,

JOSEPH I. HORTON,

Superintendent of Schools.

MANNING HIGH SCHOOL

Ipswich, Mass., Dec. 1932.

Mr. Joseph I. Horton,
Superintendent of Schools,
Ipswich, Mass.

Dear Sir:

I herewith submit my thirteenth annual report as principal of your high school.

I can well go on from where I left off in my report of last year, for conditions have continued to become more complicated. Last year we had an enrollment of 345 pupils. This year the enrollment has reached 370. I will simply call your attention to the table of enrollments for the whole school system where you will see that the numbers in the two upper classes are remaining large and the number of post graduates has increased slightly. Ipswich is no exception. Enrollment in the high school has increased everywhere very rapidly in the last ten years, and the problem of providing work adaptable to the new type of pupil has become more serious.

It is clear that the proportion in our high school has changed from a majority of those with intentions of preparing for higher institutions of learning to a large majority of those hoping to get something tangible for their immediate future. In other words many of those subjects that have always served as a foundation in mental discipline and educational structure for the individual do not present evidence enough of immediate transfer value to appeal to the mass of our present student body. The pupil is not wholly to blame for there are many in the field of education who hesitate to credit such subjects as Latin, and mathematics with any transfer or disciplinary value.

It is clear that we have a very small proportion of our pupils who seem qualified or interested to do hard work in school and this large group of pupils seems to have a serious effect upon those who can or should be doing hard serious study.

Along with this change in makeup of our school, that is—greatly increased numbers, and a majority of those uninterested in our traditional high school curriculum—has come a period of retrenchment. It seems easy for those in charge of our financial structure of the country to say the schools must retrench. Never mind what happens to the boys and girls in our school; we must have our money for the other departments of government. The next generation is already affected by this curtailment, and Ipswich is no exception. Our high school has increased in enrollment during the last two years enough to warrant an addition of two teachers to the force. The type of pupil has changed in the last few years to the extent that we should increase our equipment in manual training, home economics, and mechanical drawing. We

should broaden our work in the sciences, social studies, and art.

Instead of increasing equipment and teaching staff we have found it necessary to increase the size of classes. This gives the teacher more work, to be sure, but the real harm falls upon the pupil. It is impossible for any teacher to have 140 different pupils every day and determine definitely whether each is following the work. Some classes are of necessity made up of over 40 pupils. In that group of 40 pupils there is a wide range of mental ability. I believe it is impossible for any teacher to go slowly enough for 60% of the class to understand the work and still maintain a standard of good work with the most capable pupils.

I report with much regret that our more capable pupils are losing from lack of real competition. I have made an effort to maintain the standard of work, but if our schools includes over 60% of those that need more time and help, we must devote much of our effort to their development.

Some of our private secondary schools are instructing groups of 10 pupils or less. These groups are made up of individuals with similar ability where competition is high.

Some of our city public high schools are still maintaining small classes, and from figures recently given out by the State Department of Education, we find that in schools of our size 40% of the classes are of 20 pupils or less. At present we are instructing no class of less than 10 pupils, and only 15% of our classes are less than 25 pupils. 33% are over 30 and 15% over 35 with some as high as 47 pupils. I have combined classes where possible, but we have this year some small groups in certain classes that must be continued. We have three

rooms that will accommodate only 20 pupils and two other rooms that limit the size of a class to about 30 pupils. Typewriting classes are limited to the number of typewriters. The building is used to capacity every period.

Teachers have maintained their spirit and worked with all their energy and ability to maintain the spirit and standard of the school. They have had to do special work in preparation for their classes because of lack of supplementary material usually furnished. They have spent money of their own to provide equipment in some cases. They have spent money to help some who find it difficult to remain in school. During the present school year they have donated five per cent of their salary to aid the town in meeting its problems.

The development of public education in Massachusetts has been based upon the theory that the child should be educated for the benefit of the state, upon the theory that our type of government can continue only as the citizens are capable of directing the government. All people are united to give the children of the state an education for the benefit of the whole. The cities and towns of Massachusetts now provide a compulsory schooling for all normal children to the age of fourteen. All children may attend school at the expense of the public until graduation from high school. A large proportion of the children have taken advantage of the high school. Some people would take this privilege away from the masses by forcing the living standards down to the point where the day laborer can not afford even to feed and clothe his children to attend school.

School people are accused of over-enthusiasm and emphasis on education, but I doubt if there is any group

of citizens so cognizant of the problems in the community or average home as are teachers. We also realize that some of our best leaders, many of our greatest inventors, and some of our best statesmen come from the most ordinary homes. If these people are to develop in our present complex social conditions, they must have an opportunity.

We have heard much discussion on depression; we have heard many ideas for solution. Some even suggest that our scientific development is the cause of our present plight. Whatever the cause, the situation remains that the average person hasn't money to spend, and yet there was never so much wealth in any country as there is in the United States at the present time. The community, state, and nation can put this money into circulation, for money is but a means of transfer of value, and so long as the United States has the wealth it has at present, there is no reason for not giving every man a chance to support his family in return for some labor or service.

There was never a greater need for an intelligent citizenry, and undoubtedly the stress in high school work must be placed upon the training of our young people to take their places in business, social, and governmental affairs. Our social sciences provide opportunity for a discussion of the problems of government, society, and economics.

We still have some pupils who hope to continue in their formal school education, and for these we must continue to present subjects recognized by the colleges for entrance.

The graduates of last year are in most cases finding a place to maintain and to continue their development. Three are in college, one in normal school, and seven in

other schools of special training. Ten have returned for post-graduate work and others who are not employed regularly seem to find some work. It is discouraging to these young people to be turned out of school at a time when there seems to be very little for them to do. I feel certain, however, that the person with training and ability is in a position to step into business, industry, or special training when the opportunity comes. The employer is going to choose the most fit for his work; the community must choose the best fitted of these young people to take the places of those giving up the problems of government, and it appears that the coming generation has some serious problems to settle. They need discipline and mental training to meet the situation.

Graduation of the class of 1932 followed the usual plan with the address by Reverend Carroll Perry in commemoration of the life of George Washington.

In connection with the graduation exercises the school was presented with two paintings by the late Arthur W. Dow, the gift of the late Mrs. Dow. The presentation speech was given by Arthur W. Johnson, including a history of the paintings with a brief outline of Mr. Dow's career, emphasizing especially his interest in and love for Ipswich. These pictures should serve as an inspiration to the pupils and as a constant reminder of one who has given Ipswich the honor of a place in the field of art.

One scholarship of \$200 from the Roxanna Cowles fund was presented to Evelyn Dodge as was the scholarship from the Ipswich Woman's Club. The school honor was awarded for four years to Henry Prisby and Donald Wood; for three years to Evelyn Dodge; for one year to Anne Patch, Margaret McLeod, Ida Wells, John Bialek, Virginia Patch, and Arthur Brennan. The Washington

Franklin Medal for excellence in the study of American History was presented to Ida Wells.

The Class Day program as usual provided for the class parts and a short play. The play was taken from an incident in Washington's life in honor of the general observance of the George Washington Bicentenary.

Music, manual training, and domestic science are under department heads and will be discussed in special reports. Allow me to say, however, that these departments are serving a very definite purpose in our school at the present time.

ATHLETICS

Athletics have come to take an important place in the development of our boys, and we feel that for a school of our size we have reason to be proud of our results. We have had about 40 boys active throughout the year in baseball, basketball, hockey, and football.

We have organized and developed excellent teams, and in football we have had enthusiastic crowds but very little income. For some time those interested in maintaining athletics in our school have advocated a closed field, feeling that athletics could thus be made more nearly self-supporting. This idea with the feeling that the money donated by the teachers could be spent for hand labor and at the same time accomplish some permanent good, led the selectmen, upon recommendation of the special committee, to use the money for the purpose of grading an athletic field on land already owned by the town. The other town officials, considering the project, gladly contributed to the work. As a result about \$1,400 has been expended entirely for labor. The men who have had an opportunity have worked with an excellent spirit.

The town departments have been relieved in their expenses because of unemployment to the extent of the donation, and the town has an athletic field well under way. If this field can be completed and put to use next fall, I feel confident that it will repay to the town in saving of athletic expense nearly one-fifth of its cost the first year. This work has been done through the co-operation of the selectmen, school department, and the superintendent of streets. Frank Wood has more than co-operated; he has put in many hours of his own time in planning the work. In addition to these men who have taken responsibility, the following have helped directly by donation of teams, trucks, and skilled service: James H. Proctor, The Richard Crane Estate, Robert Lowe, Michael Tullercash, Robert McKenzie, Wilfred Wile, Lathrop Bros., Manzer & Damon, Benjamin Davis, Orrin L. Parsons, Adam Smolenski, Michael Ryan, The North Shore Gas Company, and John A. Singer.

Not least in the way of aid is the almost unanimous support of those who recognize the value of the expenditure of this money.

I wish to express my appreciation of the co-operation of parents in our efforts to lessen the financial burden upon pupils of our two upper classes. Many unable to attend the meeting for a discussion of this problem have shown their interest and approval. Allow me to express my appreciation for the co-operation of all those who have aided our work either by services, donations of magazines and books, or entertainment.

To the school committee and to you, sir, I wish to express my sincere thanks for your patience and many expressions of confidence.

Respectfully submitted,

RALPH C. WHIPPLE.

FIFTY - EIGHTH
ANNUAL COMMENCEMENT
OF THE
MANNING HIGH SCHOOL
CLASS OF 1932

THURSDAY EVENING, JUNE 23
8 o'clock

Program

President	Richard Mansfield
Vice President	George Greene
Secretary	Douglas Wood
Treasurer	Donald Wood

BURLEY SCHOOL

Mr. Joseph I. Horton,
Superintendent of Schools,

Dear Sir:

The enrollment this year has fallen very little in spite of the working conditions in town. We have enrolled two hundred eighty-five pupils, nineteen less than last year.

The attendance has been very good with the exception of one period, when mumps flourished. Thus far we are free from the prevailing epidemic of grippe.

The school work has progressed as usual. Again this year we have laid stress on the subject of reading and we feel that great gains have been made in this particular subject.

Domestic Science and Manual Training have been discontinued in the sixth grade. This gives an extra period of forty-five minutes for individual work. A great deal of individual work is being done in the fourth and fifth grades with special children. They lost out in the lower grades and have, on account of age, been ad-

vanced. The teachers are giving much after time to these pupils and I feel that this is a very creditable work.

Teachers and pupils feel greatly the loss of Miss Stewart whom we all learned to love and whose memory we will always cherish.

Miss Fowler has been with us long enough to show her worth and to endear herself to pupils and teachers. We do not hesitate to refer cases to her concerning defective eyes, clothing for needy children and sickness among absent pupils. She readily attends to all requests of this kind.

Many pupils are sent to Dr. Collins and Miss Fowler at the Winthrop Health Office each morning for inspection. Some pupils are allowed to return to school while others are excluded for a short period.

At Christmas, some time is given to Junior Red Cross work. Remembrances are sent to the Coburn Home, Cable Memorial Hospital and to the fathers and mothers of the pupils. These gifts are made by the children and they delight in the spirit of giving what they make.

The teachers have formed a Club, the nature of which is two-fold. The poet Whittier and his works have been studied quite extensively for one feature. Sewing has made up the other part. Dry goods have been purchased with the money paid for dues and several dresses have been made for worthy children. The Club work has been most enjoyable as well as helpful.

Miss Zylka, a Salem Normal graduate has been observing in the different grades. Her visits have been very helpful to us as well as to herself. During her stay all of the teachers were able to take a Visiting Day, due to Miss Zylka's being willing to substitute for them. She has also substituted in cases of illness.

Evening Session of Educational Week brought out, as usual, a great number of parents who were interested in the children's work. Pupils and parents enjoy the evening greatly and look forward to it each year.

The grounds in front of the building have been greatly improved by a new hedge and several evergreen shrubs. This has been a long needed want. When more funds are available I hope the playground can be levelled and playground paraphernalia purchased.

This year, like all others has passed quickly. The teachers have given their best work and I trust that the interest and co-operation of the past will continue.

To you, Mr. Horton, and all others who kindly assisted in carrying on the work, both teachers and pupils are thankful.

Respectfully submitted,

NELLIE T. SMITH.

SHATSWELL SCHOOL

Mr. Joseph I. Horton,
Superintendent of Schools.

Dear Sir:

I herewith present the annual report of the Shatswell School.

The enrollment this year has remained close to three hundred. Many families have moved from this section of the town but others have come in to take their places. Several of these are new comers to Ipswich.

The pupils have maintained the usual good attendance record and parents have co-operated with us in our efforts to eliminate tardiness from the reports.

There are nine classes and the same teaching staff as last year. The teachers are striving earnestly to give the children a firm foundation in the basal subjects and also instill into their plastic minds some of the principles of good character and citizenship. Too much stress cannot be put on this work as the future of our country depends upon the kind of citizens the children of today become.

Mr. Grant takes the usual good care of the building and grounds. The leveling of the ground is nearly finished and we hope to have some gravel put in the low places soon. Several trees were set out last spring, among them two handsome mountain ash trees, planted in memory of our much loved friend and benefactor, Martha J. Stewart.

The pupils are vitally interested in the extra curricular activities of the school. These activities are correlated with the regular subjects, especially character building. The teachers are trying to impress the children with the idea that all good citizens have responsibilities in their community. They should have respect for the aged and infirm, thoughtfulness for the sick, and love for the parents, home and family.

All the classes belong to the Junior Red Cross and are enthusiastic members. They have made appropriate place cards, tray favors, bon bon baskets, scrap books, etc., and sent them to the Cable Hospital, Coburn Home and Children's Hospital as holiday remembrances.

Christmas boxes were packed with toys and sent to our less fortunate neighbors across the ocean.

Last fall we received a splendid book from Roumania. It contained samples of the language, drawing and hand work done in a Girls' School in Bucarest. A book about Ipswich will be sent in return in a few weeks.

At Christmas the children made gifts for their parents. Of course these were very simple gifts, but they helped teach the old lesson, "It is more blessed to give than to receive."

Each class had a Mothers' or Parents' Afternoon when they sent invitations to their parents and entertained them with interesting exercises and refreshments. The bond between home and school must be strength-

ened if we are to help the pupils to do their best work.

On Arbor Day two fine Washington elms were planted in front of the school. Appropriate exercises were held and Mr. Horton gave a splendid talk to the pupils.

The pupils of the sixth grade spent a very profitable and enjoyable day at the Natural History Museum and Franklin Park, in Boston. By selling garden seeds and holding sandwich sales, they earned enough money to defray all expenses. A trip of this sort is inspiring as well as instructive.

The evening session held in connection with Education Week was well attended by parents and friends. Although the weather was inclement, over two hundred fifty people visited the school.

In closing allow me to express my sincere gratitude to you, the teachers, parents and all others who have helped make our work a success.

Respectfully submitted,

AUGUSTA A. GRENACHE.

PAYNE SCHOOL

Mr. Joseph I. Horton,
Superintendent of Schools.

Dear Sir:

This year at the Payne School we have an enrollment of one hundred thirteen pupils. The attendance since September has been discouragingly poor, due to many cases of illness. An epidemic of mumps, which was at its height in November, greatly retarded the work and prevented the success of our evening session, which was held during that time.

Through the kindness of members of the fire department a number of our children have been provided with shoes and rubbers.

Milk is being supplied to several of our pupils who are underweight.

Owing to prevailing conditions which call for strict economy, perhaps it is best at this time not to speak in detail of several needed repairs and improvements which we hope may sometime be made.

Respectfully yours,

GRACE A. BOWLEN.

LINEBROOK SCHOOL

Mr. Joseph I. Horton,
Superintendent of Schools.

Dear Sir:

The enrollment at the Linebrook School is now fourteen pupils. These are distributed among six grades making it necessary for an added amount of individual attention. Four of these children are preparing for the eighth grade at the Winthrop School next year.

The librarian of the Ipswich Public Library continues to send books forming a sub-library as in the past year. Having these books at school enables the children to read and report on the ten required books which otherwise would be impossible as the distance to the library is so great. These books are also accessible to other children of the neighborhood as well as the children attending the school. Although few outsiders make use of this library, I hope that more will take advantage of this opportunity.

During Educational Week one afternoon was set aside when the parents were invited to visit the school to observe the work of their children, and how the class was conducted.

Respectfully submitted,

ELEANOR M. CASALI.

DOMESTIC SCIENCE

To the Superintendent of Schools,
Ipswich, Mass.

Dear Sir:

With the changing of the program, eliminating the sixth grades and adding more high school classes, more of the older girls are given a chance to take Domestic Science. At this age the pupil retains more of the work accomplished and it is of greater value to her.

Besides the dressmaking part of the work, correlating subjects are taught under the title of Home Management:

- I My House
- II My Family
- III My Money
- IV Child Study
- V Home Hygiene
- VI First Aid

All high school girls taking this course have supper together once a month. Supper is served at cost, which averages twelve cents a person. Each month a different group of girls is in charge, giving everybody experience in buying, preparing and serving food in quantity.

Old clothing was brought in by many of the Winthrop School pupils, and this clothing was repaired or made over and pressed by the high school students and then given to the school nurse for distribution.

At Christmas time stuffed toys were made out of small pieces of materials that were left over from garments made in class. These toys were given to the needy.

In the fall the eighth grade classes in cooking, did canning for many of the town's people, who supplied their own materials. This gave the girls an opportunity to learn the methods of canning and it also helped the women, who were too busy to do their own canning.

In this department we wish to co-operate with any women of the town who need help in solving their clothing and food problems.

Respectfully submitted,

E. FRANCES PARKER.

MANUAL ARTS

Mr. Joseph I. Horton,
Superintendent of Schools.

Dear Sir:

The number of pupils taking Woodwork and Mechanical Drawing in the High School has greatly increased. This year there are three divisions of High School boys in each of these subjects.

We have tried to make the Manual Arts Department of greater service to the community. In making this work as practical as possible the high school woodworking classes have done a number of repair jobs for the school and townspeople. We have repaired and refinished chairs and tables, made and repaired screens, framed pictures, repaired the fence and other school property, set twenty panes of glass, sharpened knives and scissors, and put up a ceiling in one of the hallways of the Town Hall.

The work by the boys in all three years of Mechanical Drawing is very satisfactory. The first year course is introductory. The work covered includes lettering, sketching, isometrics, cabinet and oblique drawing, orthographic projection, geometrical construction, dimensioning, sections, and auxiliary views. In the second year one half of the course is on sheet metal pattern drafting. The last half year they are taught to draw revolutions of solids, inter-sections, helix and thread forms, and special types such as map drawing and electrical drafting. All of their work is inked and tracings and blueprints made of some problem. Boys taking the third year of drawing start with perspective drawing. Then each boy chooses his own design and works out a full set of plans, elevations, and details for a house.

Boys in the seventh and eighth grades are allowed to choose projects within their ability which involve the combination of things which they have learned. These boys have repaired sleds, toys, and other things they have brought from home.

People are apt to judge this work on the appearance or value of the articles produced. Especially in the beginning classes, this gives but a narrow interpretation

of its true values. Every visitor to the shop will recognize the fact that no boy can be surrounded by fine tools and equipment and be engaged in productive and constructive activity without deriving a great deal of benefit besides that which may be indicated by his work.

Respectfully submitted,

RODERICK MACDONALD.

REPORT OF THE S. P. P. C.

My dear Mr. Horton:

You have asked me to give you a brief outline of the work of the Society of Prevention of Cruelty to Children, during 1932. The Ipswich Branch is the only one combining charitable work with its usual functions, it having taken over the Associated Charities some years since. We are a part of the North Shore Branch, maintaining central offices at Beverly, and having a trained worker one-half a day a week in the Town. We have had before, one whole day, but in spite of increased work, lack of financial support has forced the reduction. However, this year we are one of the few self supporting branches in the State, a fact of which we are proud. We have never had to have financial aid from the parent office.

Miss Pamela Dulaney, our Agent, who by the way studied under Dr. Frederick Knight, well known to Ipswich people, is a young woman of brilliant mind, rare tact and unusually attractive personality, and is well liked by all those with whom she comes in contact.

The Society has access to the Temporary Home in Boston, with medical care for all needy cases, and contact with the courts and all institutions. Inquiries this year have spread to three foreign countries and 16 other States.

The total families in Ipswich investigated during 1932 have been 45, involving 130 children, requests for aid coming from various sources, — the schools, churches, courts, general public and the families themselves. Physical neglect caused 56.9% of the complaints this year, non-support second with 30.1% (four of these cases requiring court action), moral neglect 24.1% and separation of parents, fourth, with 21.5%. These figures are rather interesting.

The aid given by the local Directors is medical and financial. The latter is always temporary. Between 50 and 60 children have been furnished with glasses this year through the kindness of the Boston Society of Optometrists at a nominal cost to parents. This work has been conducted by the Society for three years, and we consider it one of our most worthwhile functions.

Miss Monahan at the Hospital has arranged many cases of tonsil and adnoid removal, sometimes with our financial assistance, and we are indebted to the Staff doctors for their aid. Our new school physician, Dr. Collins, has done particularly good work among the school children.

We are also indebted to our many friends who have

been so generous this hard year, and to Mr. Hull of the Welfare Dept. for his wise and patient counsel. His spirit of co-operation is always in evidence, and it cannot be too strongly stressed that even in a small town, overlapping is bound to occur unless there is this spirit among those who are doing welfare work. It has been a pleasure to have Miss Fowler's help in the school.

Although it does not belong properly in this report, except that it concerns children, I want to speak of the men at the Fire Station. This year they gave between 500 and 600 youngsters a happy Christmas, in spite of the fear that never again would so many toys be forthcoming. Few people realize the time and thought they and their wives have spent in repairing and delivering toys and dressing dolls, and although little is said about other good works they are doing, evidences of it are apparent everywhere. It is plain to be seen their efficiency is not confined to their own particular line of work.

Last year we were told we might have 20% of the money collected, in the drive which the Salvation Army held, the total amounting to \$187.99. This to my knowledge, and I have asked the Army people themselves for information, is the first and only benefit with one vague exception the Town has had. In addition to their drive, they have solicited the Town six other times at least from Gloucester and Boston. In spite of the undoubted good which the Army does, it would seem we should support our own institutions first, and these small offerings which must sum into a large total might better be dropped in the firemen's Christmas boxes, or into the alms of the various churches.

The Society is grateful always for donations of clothing, particularly shoes. If not distributed during the

year, they are put into the annual rummage sale which it holds and sold for a small amount, a better way to my mind, than giving outright.

I know of no better investment than a gift of money for milk for children. We are supplying several families and Mr. Horton, I believe is also giving from a fund at his disposal. Without doubt this time of financial stress will show its effects of malnutrition upon the young generation, and aside from any humanitarian view point, it is poor economy to let it go unchecked and fill our tubercular and other sanitariums in after years with those, who, with a little help now might face life with sturdy bodies.

VERA ROSS.

DEPARTMENT OF HYGIENE AND MEDICAL
INSPECTION

REPORT OF THE SCHOOL PHYSICIAN

Mr. Joseph I. Horton,
Superintendent of Schools,
Ipswich, Massachusetts,

Dear Sir:

The annual examination of the pupils was completed early in the school year, there being examined for record 1,507, of which 1,137 were in the Grades, and 370 in the High School.

Notwithstanding numerous cases of mumps, chicken pox, lagrippe, and impetigo which interfered with the school attendance, the average health of the pupils has been good.

Every morning during the school period, the School Physician spends an hour at the office in the Winthrop School where pupils are sent by the teachers for examination and first-aid, those having, or suspected of having contagious diseases are sent home, and recommended to see their family physician for further treatment.

The State Department of Education does not wish any school physician to run a clinic, but requires the school physician to give first-aid only, any further treatment being given by the family physician, or a physician furnished by the town, or one of the various organizations in the town.

I wish to express my appreciation to you, Mr. Superintendent, and to the teachers, and to all others for courtesies shown, and assistance rendered, and hope the same spirit of co-operation will be continued.

Respectfully submitted,

FRANK L. COLLINS, M.D.,

School Physician.

Ipswich, Mass., Jan. 31, 1933.

SCHOOL NURSE'S REPORT

Ipswich, Mass., February 2, 1933.

Mr. Joseph I. Horton,
Superintendent of Schools,
Ipswich, Massachusetts,

Dear Sir:

There is herewith submitted a brief report of the work of the School Nurse for the 1932 school year.

The duties of the School Nurse are varied, the regular program including assisting physicians with health examinations and clinical work of all types, first-aid for minor illnesses and injuries, individual health inspection of pupils for control of communicable diseases and follow-up work among children and parents.

During the past year, as perhaps never before, a great deal of relief work has been necessary. This has entailed many visits to homes, thus establishing a much closer relationship between the home and school. These contacts have made it possible to aid many worthy cases.

There are two major clinics which should be emphasized, namely, the Dental Clinic and the Chadwick. The dentists of the town have given freely of their time and experience and excellent results have been obtained. The Chadwick Clinic is part of the ten-year program of the Commonwealth for the control of tuberculosis. This clinic was conducted in Ipswich this year and the original ten-year plans were followed up.

With the co-operation of the Society for the Prevention of Cruelty to Children an eye clinic was established during the year and many children have been benefited thereby.

Much credit is due parents, teachers and the various organizations for their assistance in carrying out the Health Program for the school children.

Respectfully submitted,

M. PERCY FOWLER,

School Nurse.

HEALTH DEPARTMENT

Ipswich, Mass., Jan. 13, 1933.

Mr. Joseph I. Horton,
Supt. of Schools,
Ipswich, Mass.

Dear Sir:

I have just completed my inspection of the sanitary conditions at the various schools and find them in a clean and orderly condition with the following exceptions.

The disenfectant containers in the schools should be filled and in working order at all times.

There should be some kind of deodorizer installed in the boys toilets at the Shatswell, Burley, and Winthrop Schools and in each of the toilets at the Payne School. I find two of the toilets at the Payne School are not in working order, and should be fixed at once.

I would recommend that the toilets at the Winthrop School be given a coat of paint in order to give them a cleaner appearance, and that the boys toilet be provided with better ventilation, if you could arrange to have it done at this time.

I wish to thank you at this time for your prompt cooperation in attending to the matters which I spoke to you about in my last inspection, and would greatly appreciate the same cooperation in the matters I have suggested above.

Yours truly,

BRAINARD C. WALLACE,

Sanitary Agent for the
Board of Health

WINTHROP SCHOOL

To the Superintendent of Schools,
Ipswich, Massachusetts,

Dear Sir:

Herewith is submitted a brief report of the work of the Winthrop School.

Our total enrollment is four hundred thirty children, sixteen more than last year. This increase is in grades

seven and eight. We have two divisions in grade eight, listing forty-eight and forty-nine pupils respectively. The two sixth grades are smaller than usual with thirty-eight pupils each. Of late there has been a great falling off in attendance as one epidemic of sickness has followed another.

The general routine of former years has been followed with here and there changes in revisions and readjustments. The teachers have worked early and late on the essential subjects in the curriculum. At times the progress seems slow especially when many pupils are absent as has been the case this past term. Teachers hold special classes after school every day in order to give the children an opportunity to make up work which they have lost or do not understand. If pupils fail of promotion, the cause cannot be laid to the teacher.

For several years the seventh and eighth grade children have taken up special units of work to develop, for example, **"The History of Ipswich," "The Old Bay State," "Trips Across Our Country,"** etc. This year we have selected as our units of work for development, **"History of Money,"** and **"Means of Communication."**

These units are chosen because they well work out certain problems, the outcomes of which are not only in terms of information and subject matter but also in terms of power, skills and habits.

Manual Training and Domestic Science have been discontinued in grades six as Mr. MacDonald and Miss Parker were obliged to give the time to the Senior High school pupils. Even so, two small divisions of grade seven are obliged to remain until four o'clock in order to get their hour period each week.

This year teachers find that it is much easier to obtain reports on the required outside reading, showing that there is a growing interest, on the part of the majority of pupils, in reading worth-while books. This gain will be recognized later as the pupils will show improved reading ability and a larger background of information.

Our pupils, in competition with others, compare favorably. In the First National Stores' History Contest, Alice Karchonis and David Smith won prizes. Josie Nalepka won a prize for one of the best original poems sent in to one of our daily newspapers.

The many new textbooks received from the school committee last year are greatly appreciated by both teachers and pupils. The content, pictures and illustrations are much more interesting than our old worn out materials.

The seventh and eighth grade pupils are working on health projects as outlined by the Essex County Health Association under the direction of Miss Kaufer. Much interest is added to the work through motion pictures given in the various rooms by Miss Kaufer.

Interesting and instructive port folios have been received from the Junior Red Cross. This exchange of daily work with foreign countries increases realistic interest and is always enjoyed by the pupils. We, in return will send port folios of our work, made by the pupils, to these friends.

In October boxes were filled with toys and dolls' clothing and sent to the office of the Junior Red Cross. Various projects were undertaken by the different grades at Christmas time. One class made boxes from plans in their drawing course. The teachers filled the boxes with

candy. The pupils then gave them to some member of their families. Other grades made desk calendars and memorandum pads for Xmas gifts, the teacher providing the necessary material. Our teachers saw that every child had the pleasure of giving some little Christmas gift this past season. The greater part of the work was done out of school time. Four of our teachers served candy and cookies to all their pupils. One teacher had her pupils make a book of "**Questions and Answers,**" which she sent to "**Shut Ins.**" This book consisted of four hundred questions and answers, ten of which were composed by each pupil. They dealt with a great variety of subjects, as politics, inventions, discoveries, and literature.

From the money apportioned to our school from the Teachers' Whist party many pairs of rubbers have been bought for children who sorely needed them and for which they were very grateful.

This past term an appeal for outgrown clothing was made which brought a prompt response from pupils and teachers. All articles needing repairs were taken care of by Miss Parker of the Domestic Science department before being turned over to Miss Fowler for distribution.

The number of people visiting the school during the evening session in November surpasses all previous records. This annual custom of Educational week seems to be growing in popularity.

Acting on the suggestion of our superintendent, the teachers, this last year, visited nearly all the parents of their children. They reported a very cordial welcome. The parents evinced a desire to cooperate; a better understanding between teacher and parent was established,

and a closer tie between home and school resulted. This cooperation between home and school helps to measure success for our boys and girls.

As this report is being written Miss Stewart comes to mind. The pleasures she shared with us, the real friendship and sympathy which she felt for teachers and children and the self-sacrificing spirit with which she gave her life in service will be an inspiration to all. Such friendship enriches our lives as material things never can. We shall always remember her not with sadness but with gladness that we have been privileged to know her as a real friend. We are pleased that the school board saw fit to appoint Miss Percy Fowler, who so efficiently, quietly and unassumingly goes about her work, as Miss Stewart's worthy successor.

As last year commemorated the bicentennial of Geo. Washington's birth we were pleased to present for our graduation exercises the "**Music of Washington's Time.**" With few exceptions the graduates have entered Senior High School. The program and list of graduates follow:

I have spoken not so much of matters of routine type but of subjects which we have been stressing this year more than formerly. The year has been one of earnest endeavor on the part of all, working most effectively and harmoniously in the interests of the pupils.

In closing we would acknowledge our gratitude to the school committee for their promptness in providing supplies especially our new text books; we are grateful to all parents and friends for their help and cooperation; and especially Mr. Horton, do we appreciate your kindness and ever readiness to give us advice and help.

Respectfully submitted,

KATHERINE F. SULLIVAN.

GRADUATION

JUNIOR HIGH SCHOOL

June 21, 1932

PROGRAM

1. Invocation Rev. James G. Cairns
2. Selections Junior High Orchestra
3. Singing, "Shout Aloud In Triumph" Chorus
4. Prologue, Historical Sketch of Music of Washington's Time.
Shirley Knowles
5. Essay, Our First Patriotic Song Nancy Lord
6. Singing, "In Freedom We're Born" Boys' and Girls' Chorus
7. Essay, Story of Yankee Doodle Jean Austin
8. Singing, "Yankee Doodle" Boys' Chorus
9. Essay, Francis Hopkinson as a Composer Ralph Hill
10. Solo, "My Days Have Been So Wondrous Clear"
Barbara Gilbert
11. Violin Solo, "Enraptured I Gaze" Doris Arthur
12. Essay, William Billings, Father of New England Music
James Critch
13. Singing, "Chester" Girls' Chorus
14. Essays, The Washington Marches Wanda Marcinkiewicz,
Henry Andron, Helen Campbell, John Kiepatz

15. Clarinet Duet, "Washington at Trenton"
Frank Maciejewski - Douglas Chisholm
16. Essay, Dance Music of Washington's Time Stasia Cuik
17. Singing and Dance, "Get Away From Dis Co'nfiel"
Group of Boys
18. Singing, "Fair Land of Washington" Chorus
19. Essay, Songs from English Operas Elizabeth Kelley
20. Solo, "Norah, Dear Norah" Jennie Kzeneska
21. Duet, "The Way-Worn Traveler"
Barbara Gilbert - Helen Saunders
22. Dance, "Minuet"
23. Singing, "The Glorious Name of Washington" Chorus
24. Awarding of Diplomas
25. Singing, Class Song
26. Singing, "Star Spangled Banner"
27. Benediction Rev. J. C. Burns

FIRE DEPARTMENT

Ipswich, Mass., Dec. 19, 1932.

Mr. Joseph I. Horton,
Supt. of Schools,
Ipswich, Massachusetts,

Dear Mr. Horton:

Complying with your request for an inspection of the School buildings in town for possible fire hazards, and to offer you recommendations to adopt along the line of fire preventions, and suggestions for improvements in your fire drills, I submit the following report.

As to fire hazards, such as accumulated rubbish, waste paper, etc. in or around the buildings, there are none. As long as the Janitors of the several buildings dispose of their waste paper every day, and keep the boiler rooms and coal pens free from any inflammable material, there will be no danger from that source. I will suggest that all paint, varnish and oil cans, or barrels, be removed from the buildings as soon as emptied.

At the Manning School building, in the hall, a soda and acid extinguisher would be more effective in case of fire than the one that is there now, and I recommend that change. In the lower hallway, I recommend that chains be attached to the bolts that hold the stationary outside rear door, so that it could be opened more easily and quickly. In the basement I will suggest that hose and nozzle be obtained and attached to the fittings already installed for that purpose near the girls dressing room, and that the soda and acid extinguisher that is now in the chemical laboratory be repaired and hung on the wall near the stock room door, and that a new one of the Foamite type be procured and kept in the laboratory. All useless books and papers should be removed from the stock room and not allowed to accumulate there, so that there will be less material for a fire to feed on in case one gets started, and that the fullest distribution of supplies be made to the stock rooms of the other buildings.

At the Winthrop School building, I recommend that the press buttons that operate the fire alarm bell be plainly marked (fire alarm) and used for no other purpose, and upon the sounding of this bell, for every one to leave the building quickly, using the nearest available exit.

In the Manual Training room I recommend that the soda and acid extinguisher there now be hung on the wall where it can be seen and easily removed. At present it is on the floor where it might be covered. Also that the fire alarm signal switch and bell in the basement be relocated so as to be available to any one in the basement.

At the Burley School I shall recommend that a bell be installed on each floor to be used only as a fire alarm, and that the buttons used to operate it be plainly marked (fire alarm), and that the sounding of that bell be the signal for everyone to leave the building using the nearest available exits. At the present time, the bell used as a fire alarm is used for other purposes.

At the Shatswell School, the only suggestion that I have to offer is that the children be taught to move faster when leaving the building at fire drills.

At this time, Mr. Horton, I desire to express to you my thanks and appreciation for your efforts in making it possible for Captain John Day of the Lynn Fire Dept. and myself, to talk to some of the children in the Manning Hall during Fire Prevention Week, in October, on the subject of Fire Prevention, and to the Principal and Teachers that we had occasion to talk with at that time for their cooperation and willingness to adopt suggestions offered by Capt. Day for the purpose of making the fire drills more efficient.

Very truly yours,

EDWARD H. SMITH,

Chief of Fire Dept.

DIRECTOR OF MUSIC

Mr. Joseph I. Horton,
Superintendent of Schools,
Ipswich, Mass.,

My dear Sir:

May I submit the following report.

I hardly think it necessary to dwell upon the work in the grades, as the methods employed have not changed to any great extent during the past few years. Detailed outlines may be found in previous reports. May I say that every room in town is visited once each week, with the exception of the Linebrook school. This school is visited once each month and I assure you that it is a pleasure to visit these children, and I really feel that all the grade teachers are accomplishing more in music this year than ever before.

Our junior high school chorus—the 7th and 8th grades combined—is so large, that we felt that greater results could be obtained by working with smaller groups.

Consequently, the 7th grade rehearses one week and the 8th grade the next. They can easily be combined for any special occasion. Results prove this to be much the better way. We also have a fourteen piece orchestra in the junior high school, which is doing especially good work. Both chorus and orchestra rehearse every week and the time devoted to these rehearsals is certainly well spent.

Naturally, when the pupil enters the senior high school, his training in music while in the grades stands him in good stead. This is also the time when he derives pleasure as well from his music. We have a high school chorus that meets once a week and a girls glee club—elective—that is composed of practically every girl in school. May I say in passing that the girls elect their own officers—from the senior class—and these young ladies take full charge of the club, with the exception of directing the singing. We have a band of forty-two pieces, made up of boys ranging from Grades VI up through the high school. I cannot speak too highly of the interest shown by these boys at rehearsal. They are never absent, unless prevented by illness from attending rehearsals, and I think that the townspeople have heard them play so often, that no comment is necessary in regard to their playing ability. We have a concert orchestra of twenty-six pieces, the largest in the history of the school. This orchestra is made up of both boys and girls, and here again, I feel that we are doing good work. It is surely a wonderful training for the pupil. Also many of the pupils have expressed the desire to continue on with music after leaving school. We all sincerely hope that they may be able to do so. And we have a dance orchestra of eleven members. These boys play at all school

socials, but of course are not allowed to play for any organization not connected with the schools. We have recently organized a saxophone quartette. I am in hopes that the training may be of some slight benefit to the boys. Many pupils, who are not members of any of our musical clubs, avail themselves of the opportunity of coming to our rehearsals. May I extend a cordial invitation to the parents also. Our rehearsals are on Tuesdays and Thursdays, from 1.45 to 3.30 and I assure you that our boys and girls would be pleased to welcome any parent who might care to visit us during our rehearsals.

May I say just a word in regard to our operetta. For the past two years, the members of the school have presented an operetta. They have been successful in every way. Here again the training is of the greatest possible advantage to the pupil. It is no easy matter for any boy or girl of high school age to do solo work in public. But from the response for try-outs this past month, I rather think they are more than eager to make this years operetta as successful as those of the past. We hope to produce "Jerry of Jericho Road" sometime in April.

And now may I take this opportunity to thank you, the principals and teachers for your very hearty co-operation.

Sincerely yours,

ARTHUR HAROLD TOZER.

SUPERVISOR OF ATTENDANCE REPORT

To the Superintendent of Schools,

Dear Sir:

In submitting my annual report, I wish to state that the number of habitual truants has not been as large as in some years, but there has been a larger number of absences due to the prevalence of mumps and other diseases. Most of these have been investigated as the parents in many cases fail to report when the child is out on account of sickness.

Some cases were found where children have not had sufficient clothing to enable them to attend school, and the S.P.C.C. have been very helpful in providing that when it was possible and brought to their attention.

Five boys were brought to the attention of the court last Spring and were either put on probation or obtained work.

One other case is pending at the present time.

Owing to the lack of business in the town only 79 labor certificates were issued the past year, which is about one half the number issued in normal times.

In every case where there has been a case of truancy the parents have been very willing to co-operate in order to return the child to school.

Very truly yours,

GEORGE W. TOZER,

Supervisor of Attendance.

LINEBROOK PARENT-TEACHER ASSOCIATION

Linebrook Rd., Feb. 13, 1933.

Mr. Joseph I. Horton,
Superintendent of Schools,
Ipswich, Mass.,

Dear Sir:

The Linebrook Parent-Teacher Association held a meeting every month and have tried to bring the school and parents together. We think we have been successful in doing this. Parents and children co-operated with the Association in preparing a float which was entered in the July 4th parade.

The Association took care of the school children at Christmas time seeing that they were warm and comfortable. We hope to do more along this line the coming year.

Respectfully,

GERTRUDE J. RILEY.

NO SCHOOL SIGNALS OF THE IPSWICH SCHOOLS

4 BLASTS AT 7.30—No Morning Session in ANY SCHOOL.

4 BLASTS AT 8.00—No Morning Session in the FIRST SIX GRADES.

4 BLASTS AT 11.30—No Afternoon Session in the FIRST SIX GRADES.

In the absence of any signal at 11.30, the afternoon session will be held as usual. Teachers and pupils must be present at such sessions as on other days.

All should bear in mind that the 7.30 and 8.00 o'clock signals do NOT EXCUSE FOR THE ENTIRE DAY.

In addition to the warning given by the whistle, the street lights will be turned on for five minutes after the signal is given in each case.

In all cases **parents are expected to exercise their judgment** as to permitting their children to attend school during stormy weather.

On stormy days when the FIRST SIX GRADES are excused for the day by the 8 and 11.30 o'clock signals, the Junior and Senior High Schools will each have a single session closing at 1.30 P. M. The 11.30 o'clock signal will give parents ample warning for postponing the dinner hour.

SCHOOL CALENDAR FOR 1932 - 1933

TERM	BEGINS	CLOSES
Winter	Jan. 3, 1933	Feb. 17, 1933
Spring	Feb. 27, 1933	April 14, 1933
Summer	April 28, 1933	June 22, 1933
Fall	Sept. 6, 1933	Dec. 22, 1933

Teachers must report for duty on Tuesday, September 5 at 2 P. M., previous to the opening of school for the Fall Term. Examination of pupils who failed of promotion in June will also take place on that day.

HOLIDAYS

Every Saturday; Columbus Day, October 12; Wednesday afternoon, Thursday and Friday of Thanksgiving Week; January 1; February 22; Good Friday; April 19; Memorial Day.
